## Independent Auditors' Report

### To the Shareholder and Board of Directors of Kazakhstan Housing Company JSC

#### Opinion

We have audited the financial statements of Kazakhstan Housing Company JSC (the "Company"), which comprise the statement of financial position as at 31 December 2021, the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2021, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

#### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in the Republic of Kazakhstan, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

**Expected credit losses (ECL) on loans to customers, long-term receivables from sales of real estate under instalment agreements and finance lease receivables**

Please refer to the Notes 3(e)(iii), 4, 15 and 16 in the financial statements.

Key audit matter	How the matter was addressed in our audit
<p>Loans to customers, long-term receivables from sales of real estate under the instalment agreements and finance lease receivables represent more than 20% of total assets and are stated net of allowance for expected credit losses (ECL) that is estimated on a regular basis and is sensitive to assumptions used.</p> <p>The Company uses ECL valuation model, which requires management to apply professional judgement and to make assumptions related to the following key areas:</p> <ul style="list-style-type: none"> <li>— timely identification of significant increase in credit risk and default events related to loans to customers, receivables from sales of real estate under the instalment agreements and finance lease receivables;</li> <li>— assessment of probability of default (PD) and loss given default (LGD);</li> <li>— assessment of add-on adjustment to account for different scenarios and forward-looking information;</li> <li>— expected cash flows forecast for loans to customers, receivables from sales of real estate under the instalment agreements and finance lease receivables, which are credit-impaired.</li> </ul> <p>Due to the significant volume of loans to customers, receivables from sales of real estate under the instalment agreements and finance lease receivables and the related estimation uncertainty, this area is a key audit matter.</p>	<p>We analysed the key aspects of the Company's methodology and policies related to the ECL estimate for compliance with the requirements of IFRS 9, with the involvement of financial risks management specialists.</p> <p>To analyse the adequacy of professional judgement and assumptions made by the management in relation to the allowance for ECL estimate, our audit procedures included the following:</p> <ul style="list-style-type: none"> <li>— We tested design and operating effectiveness of controls over allocation of loans to customers, receivables from sales of real estate under the instalment agreements and finance lease receivables into credit risk stages.</li> <li>— For a sample of loans to customers, receivables from sales of real estate under the instalment agreements and finance lease receivables, for which the potential changes in ECL estimate may have a significant impact on the financial statements, we tested whether stages are correctly assigned by the Company by analysing financial and non-financial information, as well as assumptions and professional judgements, applied by the Company.</li> <li>— Regarding the loans to customers, receivables from sales of real estate under the instalment agreements and finance lease receivables assigned to stages 1 and 2 of the credit risk, for which ECL is assessed collectively, we tested the design and implementation of the related models, as well as agreeing input data for calculation of PD and LGD with supporting documents on a sample basis.</li> <li>— We also analysed the overall adequacy of the adjustment to account for various scenarios and forward-looking information and compared it with our estimates taking into account the current and future economic situation and operating conditions of borrowers and debtors included in relevant grades.</li> <li>— For a sample of loans to customers, receivables from sales of real estate under the instalment agreements and finance lease receivables of stage 3 of credit risk, we critically assessed assumptions used by the Company to forecast future cash flows</li> </ul>

	<p>receivable, including estimated proceeds from realisable collateral and their timing, on the basis of our understanding and available market information. We focused on the loans and long-term receivables from sales of real estate under instalment agreements that can potentially have the most significant impact on the financial statements.</p> <p>We also assessed whether the financial statements disclosures appropriately reflect the Company's exposure to credit risk.</p>
<p><b>Measurement of fair value of financial instruments at initial recognition</b></p>	
<p>Please refer to the Notes 3(e), (r), 8, 14, 15, 19 and 21 in the financial statements.</p>	
<p><b>Key audit matter</b></p>	<p><b>How the matter was addressed in our audit</b></p>
<p>To attract investment for development of infrastructure and business in the regions as part of the state programmes, the Company carries out a number of measures aimed at supporting the economy, including raising of funds and distribution thereof at the below-market rates. During 2021, the most significant of these transactions included:</p> <ul style="list-style-type: none"> <li>- issue of debt securities with a nominal value of KZT 51,303,774 thousand (Note 19);</li> <li>- substantial modification of the terms of debt securities issued with a total nominal value of KZT 180,000,000 thousand in terms of extending the maturity period (Note 19);</li> <li>- substantial modification of the terms of other borrowed funds from the Parent Company (Note 20);</li> <li>- purchase of the bonds of the local executive bodies (LEB) with a nominal value of KZT 258,260,312 thousand (Note 14);</li> <li>- issue of loans to the corporate borrower for the total amount of KZT 31,100,000 thousand as part of the action plan for financing an urban development project (Note 15).</li> </ul> <p>Initially the debt securities issued were recognised at fair value measured by applying relevant market interest rates to discount the future contractual cash flows.</p>	<p>We analysed the key aspects of the methodology for calculation of the fair value of financial instruments used by the Company. We assessed the reasonableness of management's estimates of market rates applied to calculate the fair values of the debt financial instruments at initial recognition and compared them to available market information, including with the involvement of our valuation specialists.</p> <p>We analysed the management's judgment whether the difference between the fair value and nominal value/carrying amount of the raised/modified debt financial instruments represents a government grant or a shareholder's contribution.</p> <p>We reviewed the supporting documents of the loans issued to the corporate borrower to confirm the intended use of the funds raised as part of the government orders and action plan for financing the urban development project. We analysed the estimate of compliance of the cash flows from the loans issued to SPPI criterion, namely, the estimate whether these loans to the corporate borrower represent the "non-recourse" asset arrangements. For this purpose we assessed the reasonableness of key assumptions used to calculate the fair value of collateral with the involvement of the valuation specialists.</p> <p>We also assessed whether the financial statements disclosure appropriately the significant assumptions related to the measurement of the fair value of the financial instruments at initial recognition, and judgements related to their classification in the financial statements of the Company.</p>

We focused on:

- the estimate of the fair value of financial instruments at initial recognition due to significant judgment involved in arriving at the estimate;
- the management judgment whether the difference between the fair value and nominal/carrying amount of the raised/modified debt financial instruments represents a government grant or a shareholder's contribution;
- classification of the loans to the corporate borrower as measured at fair value through profit or loss as these loans are restricted to the cash flows from the project implementation.

Due to significance of these transactions and given the need to apply the above judgments, this area is a key audit matter.

#### Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our auditors' report thereon. The annual report is expected to be made available to us after the date of this auditors' report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

#### Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

## Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern;
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is:

## **1 Reporting entity**

### **(a) Organisation and operations**

Kazakhstan Housing Company JSC (the “Company”) was established on 29 December 2000 as Mortgage Organisation Kazakhstan Mortgage Company JSC in accordance with the Resolution No.469 of the National Bank of the Republic of Kazakhstan (the “NBRK”) dated 20 December 2000. The principal activity of the Company is extension of the mortgage loans in accordance with the license for banking borrowing transactions issued by the authorised body. The Company may additionally perform trust, factoring, forfeiting and leasing operations. The Company is authorised to carry out the following activities:

- investment activity;
- financing and implementation of investment projects including by means of acquiring bonds issued by local executive bodies;
- conditional placements with the second-tier banks and extension of loans to other financial institutions;
- issue and placement of securities including bonds;
- lease of real estate properties including those with an option to purchase;
- granting guarantees for completion of the construction of a multi-storey residential building, its commissioning in the event of a guarantee event and the transfer of shares in the residential building to equity holders;
- extending loans to an authorised organisation designated in accordance with the Law of the Republic of Kazakhstan “On Shared Participation in Housing Construction”, and to legal entities which carry out construction as part of public housing programs;
- subsidising a part of interest rate for mortgage loans issued by second-tier banks to individuals.

On 16 February 2021 the Company obtained a banking license No.4.1.13 to carry out banking lending transactions.

The activities of the Company are regulated by the Agency for Regulation and Development of the Financial Market of the Republic of Kazakhstan.

The Company’s registered office is: Building 55A, Mangilik el Ave., Nur-Sultan, Z05T3E2, Republic of Kazakhstan.

As part of implementation of the Order of the President of the Republic of Kazakhstan Kassym-Zhomart Tokayev dated 2 September 2019 to reduce the number of operators of the housing programmes, in accordance with the Order No.156 dated 20 March 2020 of the Ministry of Industry and Infrastructure Development of the Republic of Kazakhstan, a decision was made to reorganise Mortgage Organisation Kazakhstan Mortgage Company Joint Stock Company and Baiterek Development Joint Stock Company (“BD JSC”) and Housing Guarantee Fund JSC (“HGF JSC”) through the Company’s takeover of BD JSC and HGF JSC. In accordance with the transfer and acceptance acts of 30 July 2020 and 16 November 2020, the assets and liabilities of BD JSC and HGF JSC were transferred respectively.

### **(b) Shareholders**

As at 31 December 2021 and 31 December 2020 the Company is wholly-owned by National Management Holding Baiterek JSC (“the Parent”). The party with ultimate control over the Company is the Government of the Republic of Kazakhstan.

**(c) Kazakhstan business environment**

The Company's operations are primarily located in Kazakhstan. Consequently, the Company is exposed to the economic and financial markets of Kazakhstan which display characteristics of an emerging market. The legal, tax and regulatory frameworks continue development, but are subject to varying interpretations and frequent changes which together with other legal and fiscal impediments contribute to the challenges faced by entities operating in Kazakhstan. The volatility in the global price of oil and the COVID-19 pandemic have also increased the level of uncertainty in the business environment. Recent military conflict in the Ukraine has further increased the level of economic uncertainties in Kazakhstan.

To continue as a going concern, the Company keeps carrying out its operations using a remote access and takes measures to protect health of the employees working on site, including provision of the individual protective devices, observance of distancing regime, and disinfection of the Company's premises.

These financial statements reflect management's assessment of the impact of the Kazakhstan business environment on the operations and the financial position of the Company. The future business environment may differ from management's assessment.

***State of emergency***

On 2 January 2022 protests started in Western Kazakhstan related to an increase in the liquefied natural gas price from 60 tenge to 120 tenge per litre. These protests spread to other cities and resulted in looting and loss of life. On 5 January 2022 the government declared a state of emergency. As a result of the above protests and state of emergency the President of Kazakhstan has made certain public announcements regarding possible measures including additional taxes.

On 19 January 2022 the state of emergency was lifted. The Company is currently unable to quantify what the impact, if any, may be on the financial position of any new measures the government may take or any impact from the effect on the Kazakhstan economy as a result of the above protests and state of emergency.

These financial statements reflect management's assessment of the impact of the Kazakhstan business environment on the operations and the financial position of the Company. The actual future business environment may differ from management's assessment.

## **2 Basis of accounting**

**(a) Statement of compliance**

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRSs").

**(b) Basis of measurement**

The financial statements are prepared on the historical cost basis except that financial instruments at fair value through profit or loss.

**(c) Use of estimates and judgments**

The preparation of financial statements in conformity with IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

**Judgements**

Information about judgments made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements is included in the following notes:

- key assumptions used to calculate provisions under contracts for financial guarantees for the construction projects - Note 22;
- establishing the criteria for determining whether credit risk on the financial asset has increased significantly since initial recognition, determining methodology for incorporating forward-looking information into measurement of ECL – Note 4.
- initial recognition of the government grants - Note 21.

#### **Assumptions and estimations uncertainty**

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the unconsolidated financial statements for the year ended 31 December 2021 is included in the following notes:

- impairment of financial instruments: determining inputs into the ECL measurement model, including incorporation of forward-looking information – Note 4;
- impairment of loans to customers, long-term receivables for sales of real estate under instalment agreements, and finance lease receivables – Notes 6, 15 and 16;
- loss on initial recognition of loans to customers measured at fair value through profit or loss - Note 15;
- initial recognition of debt securities acquired and issued - Notes 14 and 19; and
- estimates of fair values of financial assets and liabilities – Note 30.

#### **(d) Functional and presentation currency**

The functional currency of the Company is the Kazakhstan tenge (KZT) as, being the national currency of the Republic of Kazakhstan, it reflects the economic substance of the majority of underlying events and circumstances relevant to them.

The KZT is also the presentation currency for the purposes of these financial statements.

All financial information presented in KZT has been rounded to the nearest thousand, except when otherwise indicated.

### **3 Significant accounting policies**

The Company has consistently applied the following accounting policies to all periods presented in these financial statements.

#### **(a) Foreign currency**

Transactions in foreign currencies are translated to the functional currency of the Company at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the reporting period.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

Foreign currency differences arising on retranslation are recognised in profit and loss.

#### **(b) Cash and cash equivalents**

Cash and cash equivalents include notes and coins on hand, unrestricted balances (nostro accounts) held with the NBRK and other banks, and highly liquid financial assets with original maturities of less than three months, which are subject to insignificant risk of changes in their fair value, and are used by the Company in the management of short-term commitments. Cash and cash equivalents are recognised at amortised cost in the statement of financial position.

**(c) Interest income and expense**

***Effective interest rate***

Interest income and expense are recognised in profit or loss using the effective interest method. The ‘effective interest rate’ is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

When calculating the effective interest rate for financial instruments other than purchased or originated credit-impaired assets, the Company estimates future cash flows considering all contractual terms of the financial instrument, but not expected credit losses. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses.

The calculation of the effective interest rate includes transaction costs and fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

***Amortised cost and gross carrying amount***

The ‘amortised cost’ of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

The ‘gross carrying amount of a financial asset’ measured at amortised cost is the amortised cost of a financial asset before adjusting for any expected credit loss allowance.

***Calculation of interest income and expense***

The effective interest rate of a financial asset or financial liability is calculated on initial recognition of a financial asset or a financial liability. In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. The effective interest rate is revised as a result of periodic re-estimation of cash flows of floating rate instruments to reflect movements in market rates of interest.

However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

For financial assets that were credit-impaired on initial recognition, interest income is calculated by applying the credit-adjusted effective interest rate to the amortised cost of the asset. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

For information on when financial assets are credit-impaired, see 3(e)(iii).

***Presentation***

Interest income calculated using the effective interest method presented in the statement of profit or loss and other comprehensive income includes:

- interest on financial assets measured at amortised cost;
- interest on debt instruments measured at fair value through other comprehensive income.

Other interest income caption presented in the statement of profit or loss and other comprehensive income includes interest income from net investments in finance lease and interest income on debt securities measured at fair value through profit or loss.

Interest expense presented in the statement of profit or loss and other comprehensive income includes interest expense on financial liabilities measured at amortised cost.

**(d) Fee and commission income and expense**

Fee and commission income and expense that are integral to the effective interest rate on a financial asset or financial liability are included in the effective interest rate (see Note 3(c)).

A contract with a customer that results in a recognised financial instrument in the Company's financial statements may be partially in the scope of IFRS 9 and partially in the scope of IFRS 15. If this is the case, then the Company first applies IFRS 9 to separate and measure the part of the contract that is in the scope of IFRS 9 and then applies IFRS 15 to the residual.

Other fee and commission expenses relate mainly to transaction and service fees, which are expensed as the services are received.

**(e) Financial assets and financial liabilities**

**(i) Classification of financial instruments**

***Financial assets***

On initial recognition, a financial asset is classified as measured at: amortised cost, FVOCI or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL;
- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt financial assets measured at FVOCI, gains and losses are recognised in other comprehensive income, except for the following, which are recognised in profit or loss in the same manner as for financial assets measured at amortised cost:

- interest revenue using the effective interest method;
- ECL and reversals; and
- foreign exchange gains and losses.

When a debt financial asset measured at FVOCI is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

All other financial assets are classified as measured at FVTPL.

In addition, on initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

### **Business model assessment**

The Company makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected;
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Company's stated objective for managing the financial assets is achieved and how cash flows are realised.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

### **Assessment whether contractual cash flows are solely payments of principal and interest**

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Company considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features); and
- features that modify consideration of the time value of money – e.g. periodical reset of interest rates.

### **Reclassification**

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Company changes its business model for managing financial assets.

### **Financial liabilities**

The Company classifies its financial liabilities, other than financial guarantees and loan commitments, as measured at amortised cost or FVTPL.

## **Reclassification**

Financial liabilities are not reclassified subsequent to their initial recognition.

## ***Derecognition***

### **Financial assets**

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

Any cumulative gain/loss recognised in other comprehensive income in respect of equity investment securities designated as at FVOCI is not recognised in profit or loss on derecognition of such securities, as explained in Note 3(e)(i). Any interest in transferred financial assets that qualify for derecognition that is created or retained by the Company is recognised as a separate asset or liability.

The Company enters into transactions whereby it transfers assets recognised on its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets or a portion of them. In such cases, the transferred assets are not derecognised. Examples of such transactions are securities lending and sale-and-repurchase transactions.

In transactions in which the Company neither retains nor transfers substantially all of the risks and rewards of ownership of a financial asset and it retains control over the asset, the Company continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

### **Financial liabilities**

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

## **(ii) *Modification of financial assets and financial liabilities***

### **Financial assets**

If the terms of a financial asset are modified, the Company evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different (referred to as 'substantial modification'), then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised and a new financial asset is recognised at fair value plus any eligible transaction costs. Any fees received as part of the modification are accounted for as follows:

- fees that are considered in determining the fair value of the new asset and fees that represent reimbursement of eligible transaction costs are included in the initial measurement of the asset; and
- other fees are included in profit or loss as part of the gain or loss on derecognition.

Changes in cash flows on existing financial assets or financial liabilities are not considered as modification, if they result from existing contractual terms, e.g. changes in interest rates initiated by the Company due to changes in the NBRK key rate, if the loan agreement entitles the Company to do so.

The Company performs a quantitative and qualitative evaluation of whether the modification is substantial, i.e. whether the cash flows of the original financial asset and the modified or replaced financial asset are substantially different. The Company performs a quantitative and qualitative evaluation of whether the modification is substantial considering qualitative factors, quantitative factors and combined effect of qualitative and quantitative factors. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In making this evaluation the Company analogises to the guidance on the derecognition of financial liabilities.

The Company concludes that the modification is substantial as a result of the following qualitative factors:

- change the currency of the financial asset;
- change in collateral or other credit enhancement;

If cash flows are modified when the borrower is in financial difficulties, then the objective of the modification is usually to maximise recovery of the original contractual terms rather than to originate a new asset with substantially different terms. If the Company plans to modify a financial asset in a way that would result in forgiveness of cash flows, then it first considers whether a portion of the asset should be written off before the modification takes place (see below for write off policy). - This approach impacts the result of the quantitative evaluation and means that the derecognition criteria are not usually met in such cases. The Company further performs qualitative evaluation of whether the modification is substantial.

If the modification of a financial asset measured at amortised cost or FVOCI does not result in derecognition of the financial asset, then the Company first recalculates the gross carrying amount of the financial asset using the original effective interest rate of the asset and recognises the resulting adjustment as a modification gain or loss in profit or loss. For floating-rate financial assets, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs or fees incurred and fees received as part of the modification adjust the gross carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

If such a modification is carried out because of financial difficulties of the borrower, then the gain or loss is presented together with impairment losses (Note 3(e)(iii)). In other cases, it is presented as interest income calculated using the effective interest method (see Note 3(c)).

For fixed-rate loans, where the borrower has an option to prepay the loan at par without significant penalty, the Company treats the modification of an interest rate to a current market rate using the guidance on floating-rate financial instruments. This means that the effective interest rate is adjusted prospectively.

### **Financial liabilities**

The Company derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in profit or loss. Consideration paid includes non-financial assets transferred, if any, and the assumption of liabilities, including the new modified financial liability.

The Company assesses whether the modification is substantial based on quantitative and qualitative factors in the following order: qualitative factors, quantitative factors, combined effect of qualitative and quantitative factors. The Company concludes that the modification is substantial as a result of the following qualitative factors:

- change the currency of the financial liability;
- change in collateral or other credit enhancement;
- inclusion of conversion option;
- change the subordination of the financial liability.

For the quantitative assessment the terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability.

If the modification of a financial liability is not accounted for as derecognition, then the amortised cost of the liability is recalculated by discounting the modified cash flows at the original effective interest rate and the resulting gain or loss is recognised in profit or loss. For floating-rate financial liabilities, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs and fees incurred are recognised as an adjustment to the carrying amount of the liability and amortised over the remaining term of the modified financial liability by re-computing the effective interest rate on the instrument.

**(iii) Impairment**

See also Note 4.

The Company recognises loss allowances for expected credit losses (ECL) on the following financial instruments that are not measured at FVTPL:

- financial assets that are debt instruments;
- finance lease receivables;
- financial guarantee contracts issued; and
- loan commitments issued.

No impairment loss is recognised on equity investments.

The Company measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- debt investment securities that are determined to have low credit risk at the reporting date; and
- other financial instruments on which credit risk has not increased significantly since their initial recognition (see Note 4).

12-month ECL are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Financial instruments for which a 12-month ECL is recognised are referred to as ‘Stage 1’ financial instruments.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of the financial instrument. Financial instruments for which a lifetime ECL is recognised are referred to as ‘Stage 2’ financial instruments (if the credit risk has increased significantly since initial recognition, but the financial instruments are not credit-impaired) and ‘Stage 3’ financial instruments (if the financial instruments are credit-impaired).

***Measurement of ECL***

ECL are a probability-weighted estimate of credit losses. They are measured as follows:

- *financial assets that are not credit-impaired at the reporting date*: as the present value of all cash shortfalls (i.e., the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive);
- *financial assets that are credit-impaired at the reporting date*: as the difference between the gross carrying amount and the present value of estimated future cash flows;
- *undrawn loan commitments*: as the present value of the difference between the contractual cash flows that are due to the Company if the commitment is drawn down and the cash flows that the Company expects to receive; and
- *financial guarantee contracts*: the present value of expected payments to reimburse the holder less any amounts that the Company expects to recover.

See also Note 4.

### ***Restructured financial assets***

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognised (see Note 3(e)(iii)) and ECL are measured as follows:

If the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset (see Note 4).

- If the expected restructuring will result in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective interest rate of the existing financial asset.

### ***Credit-impaired financial assets***

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt financial assets carried at FVOCI, and net investments in finance leases are credit-impaired (are referred to as 'Stage 3' financial assets). A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or past due event;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

A loan that has been renegotiated due to a deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, the retail loans that are overdue for 90 days or more are considered credit-impaired.

### ***Presentation of allowance for ECL in the statement of financial position***

Loss allowances for expected credit losses are presented in the statement of financial position as follows:

- *financial assets measured at amortised cost*: as a deduction from the gross carrying amount of the assets;
- *loan commitments and financial guarantee contracts*: generally, as a provision;
- *debt instruments measured at fair value through other comprehensive income*: no loss allowance is recognised in the statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance is disclosed and is recognised in the fair value reserve.

### ***Write-offs***

Loans and debt securities are written off (either partially or in full) when there is no reasonable expectation of recovering a financial asset in its entirety or a portion thereof. This is generally the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. This assessment is carried out at the individual asset level.

Recoveries of amounts previously written off are included in 'impairment losses on financial instruments' in the statement of profit or loss and other comprehensive income.

Financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

**(f) Investment securities**

The 'investment securities' caption in the statement of financial position includes:

- debt investment securities measured at amortised cost (see Note 3(e)(i)); these are initially measured at fair value plus incremental direct transaction costs, and subsequently at their amortised cost using the effective interest method;
- debt and equity investment securities mandatorily measured at FVTPL or designated as at FVTPL (see Note 3(e)(i)); these are measured at fair value with changes recognised immediately in profit or loss;

**(g) Deposits, debt securities issued and subordinated liabilities**

Deposits, debt securities issued and subordinated liabilities are initially measured at fair value minus incremental direct transaction costs, and subsequently measured at their amortised cost using the effective interest method.

**(h) Repurchase and reverse repurchase agreements**

Securities sold under sale and repurchase (repo) agreements are accounted for as secured financing transactions, with the securities retained in the statement of financial position and the counterparty liability included in amounts payable under repo transactions within other borrowed funds. The difference between the sale and repurchase prices represents interest expense and is recognised in profit or loss over the term of the repo agreement using the effective interest method.

Securities purchased under agreements to resell (reverse repo) are recorded as amounts receivable under reverse repurchase agreements within cash and cash equivalents. The difference between the purchase and resale prices represents interest income and is recognised in profit or loss over the term of the repo agreement using the effective interest method. If assets purchased under an agreement to resell are sold to third parties, the obligation to return securities is recorded as a trading liability and measured at fair value.

**(i) Offsetting**

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legal right to offset the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously. The Company currently has a legally enforceable right to set off if that right is not contingent on a future event and enforceable both in the normal course of business and in the event of default, insolvency or bankruptcy of the Company and all counterparties.

**(j) Leases**

At inception of a contract, the entity assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company uses the definition of a lease in IFRS 16.

**(i) As a lessee**

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

The Company determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee;
- the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Company has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets and short-term leases. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

**(ii) As a lessor**

At inception or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

When the Company acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Company makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Company considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

If an arrangement contains lease and non-lease components, then the Company applies IFRS 15 to allocate the consideration in the contract. The Company applies the derecognition and impairment requirements in IFRS 9 to the net investment in the lease. The Company further regularly reviews estimated unguaranteed residual values used in calculating the gross investment in the lease.

The Company recognises lease payments received under operating leases as income on a straight-line basis over the lease term as part of ‘other revenue’.

Generally, the accounting policies applicable to the Company as a lessor in the comparative period were not different from IFRS 16.

**(k) Foreclosed assets**

Foreclosed assets are measured at the lower of cost and net realisable value. The cost of foreclosed assets is based on the specific identification principle, and recorded at net book value of the underlying loan or lease base at foreclosure date. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

**(l) Property, plant and equipment**

**(i) Owned assets**

Items of property and equipment are stated at cost less accumulated depreciation and impairment losses.

Where an item of property, plant and equipment comprises major components having different useful lives, they are accounted for as separate items of property and equipment.

**(ii) Depreciation**

Depreciation is charged to profit or loss on a straight-line basis over the estimated useful lives of the individual assets. Depreciation commences on the date of acquisition or, in respect of internally constructed assets, from the time an asset is completed and ready for use. Land is not depreciated.

The estimated useful lives are as follows:

- Buildings	8-100 years;
- Computer equipment	3-5 years;
- Vehicles	5-7 years;
- Other assets	3-14 years.

**(m) Intangible assets**

Acquired intangible assets are stated at cost less accumulated amortisation and impairment losses.

Acquired computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software.

Amortisation is charged to profit or loss on a straight-line basis over the estimated useful lives of intangible assets. The estimated useful lives range from 1 year for software to 20 years for licenses.

**(n) Investment property**

Investment property is property held either to earn rental income or for capital appreciation or for both, but not for sale in normal course of business, or for the use in production or supply of goods or services or for administrative purposes. Investment property is stated at cost less accumulated depreciation and impairment losses.

Depreciation is charged to profit or loss on a straight-line basis over the estimated useful lives of the individual assets. Depreciation commences on the date of acquisition of the asset. The estimated useful life of investment property is 60 years.

When the use of a property changes such that it is reclassified as property and equipment, its fair value at the date of reclassification becomes its cost for subsequent accounting.

**(o) Assets held for sale**

Non-current assets, or disposal groups comprising assets and liabilities, that are expected to be recovered primarily through sale rather than through continuing use, are classified as held for sale. Immediately before classification as held for sale, the assets, or components of a disposal group, are remeasured in accordance with the Company’s accounting policies. Therefore, such assets, or disposal group, are generally measured at the lower of their carrying amount and fair value less cost to sell.

**(p) Inventories**

Inventories include assets to be transferred under finance lease agreements and other inventory. Assets to be transferred under finance lease are real estate objects acquired by the Company and transferred to the lessees once the title of ownership on objects is obtained. Inventories are measured at the lower of cost and net realisable value. The cost of inventories is based on the weighted average principle, and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

**(q) Impairment of non-financial assets**

Other non-financial assets, other than deferred taxes, are assessed at each reporting date for any indications of impairment. The recoverable amount of non-financial assets is the greater of their fair value less costs to sell and value in use.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs. An impairment loss is recognised if the carrying amount of an asset or its related CGU exceeds its estimated recoverable amount.

All impairment losses in respect of non-financial assets are recognised in profit or loss and reversed only if there has been a change in the estimates used to determine the recoverable amount. Any impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

**(r) Government grants**

Government grants are assistance by the Government, Government agencies and state-owned entities in the form of transfers of resources to the Company in return for past or future compliance with certain conditions relating to the operating activities of the Company. Government grants are not recognised until there is reasonable assurance that the Company will comply with the conditions attached to them and the grants will be received. The benefit of a government loan at a below-market rate of interest is treated as a government grant. The benefit of the below-market rate of interest is measured as the difference between the initial carrying value of the loan and the proceeds received.

Government grants that compensate the Company for expenses incurred are recognised in profit or loss as expenses on a systematic basis in the same periods in which the expenses are recognised.

Government grant liabilities on financing Nurly Zher Programme will be utilised as far as discount on purchase of local executive bodies' bonds at a low interest rate is recognised, and a part of Government grants will be amortised in other operating expenses on a straight-line basis over the period of 20 years as far as finished flats are recorded on the Company's balance sheet.

**(s) Financial guarantees**

Financial guarantees are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument.

Such contracts are initially recognised at fair value. After initial recognition, such contracts are measured at the higher of the amount recognised as expected credit losses, and the amount initially recognised less, when appropriate, cumulative amortisation recognised.

**(f) Contracts for granting guarantees for construction projects**

Contracts for granting guarantees for construction projects are aimed at guaranteeing the completion of the construction of a residential building, its commissioning in the event of a guarantee event (including bankruptcy of the developer) and the transfer of shares in the residential building to equity holders. The company views contracts for the granting of guarantees for construction projects as insurance contracts and applied IFRS 4 *Insurance Contracts* in respect of each contract separately, since the main characteristic of the activity is the future event, in the occurrence of which there is no certainty.

Agreements under which the Company assumes a significant insurance risk of the other party (hereinafter referred to as the “insured”), agreeing to complete the construction of the residential building upon occurrence of a warranty event and transfer of ownership shares in the residential building to the housing equity holders. Insurance risk is the risk other than financial risk. Financial risk is the risk of a possible future change in one or more of a specified interest rate, security price, commodity price, foreign exchange rate, index of prices or rates, a credit rating or credit index or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Insurance contracts may also transfer some financial risk.

Insurance risk is significant if, and only if, an insured event could cause the Company to pay significant additional benefits. Once a contract is classified as an insurance contract, it remains so until all rights and obligations expire or are fulfilled.

**(i) Recognition and measurement of insurance contracts**

***Commission on guarantee agreements (insurance premium)***

The guarantee contract comes into force from the date of payment of the guarantee fee. Deferred revenue under a guarantee contract for construction projects is formed under all existing contracts for the provision of guarantees for construction projects and represent the amount of unearned compensation at the settlement date. Amortization of commissions received is recognized as income.

***Liabilities on insurance contracts***

Obligations under insurance contracts include a reserve of incurred but not reported losses (IBNR reserve) and a reserve for reported, but not settled claims (RBNS).

IBNR is formed to recognize the estimated value of losses that occurred, but which have not yet been reported to the Company. In assessing the IBNR, the Company relies on its past experience, adjusted for existing trends, and external factors, as well as statistical forecasts.

Obligations under insurance contracts are terminated to be recognized when liabilities for payment of losses have expired, fulfilled or been cancelled.

**(ii) Liability adequacy test**

At each reporting date, the adequacy of obligations under insurance contracts is assessed using the existing test for adequacy of liabilities. The value of liabilities is adjusted to the extent that it is insufficient to meet future compensation payments and expenses. The test uses the best current estimates of future contractual cash flows, taking into account the cost of settlement of losses and the cost of administering the policy, as well as the investment return on the assets that provide such obligations. Any inconsistency is charged to the income statement through the creation of a provision for unexpired risks.

**(u) Share capital**

**(i) Ordinary shares**

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of the ordinary shares and share options are recognised as a deduction from equity, net of any tax effects.

**(ii) Repurchase of share capital**

When share capital recognised as equity is repurchased, the amount of the consideration paid, including directly attributable costs, is recognised as a decrease in equity.

**(iii) Dividends**

The ability of the Company to declare and pay dividends is subject to acting legislation of the Republic of Kazakhstan.

Dividends in relation to ordinary shares are reflected as an appropriation of retained earnings in the period when they are declared.

**(v) Taxation**

Income tax comprises current and deferred tax.

Income tax is recognised in profit or loss except to the extent that it relates to items of other comprehensive income or transactions with shareholders recognised directly in equity, in which case it is recognised within other comprehensive income or directly within equity.

Current tax is calculated on the basis of estimated amount of the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and the amount of the liabilities, occurred as a result of the income tax adjustment for the previous years

Deferred tax assets and liabilities are recognised using balance sheet method in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax assets and liabilities are not recognised in respect of temporary differences on the initial recognition of assets or liabilities in a transaction that affects neither accounting nor taxable profit. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date

The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the temporary differences, unused tax losses and credits can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that taxable profit will be available against which the deductible temporary differences can be utilised.

**(w) Segment reporting**

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses related to transactions with other components of the Company); whose operating results are regularly reviewed by the chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

**(x) Accounting for business combinations under common control**

A merger of entities under common control is a business combination in which all of the combined entities are ultimately controlled by the same party or parties, both before, and after the combination, and that control is not transitory.

The effect of business combinations under common control is accounted for by the Company using 'pooling of interests' method, provided that the assets and liabilities of the merging entities are measured at their carrying values at the date of merger, the transaction costs related to the merger are expensed in the income statement, mutual balances are eliminated from the balance sheet, any difference between the purchase price paid/transferred and the net assets acquired (at their carrying values as disclosed in the financial statements) is recognised in equity.

**(y) New standards and interpretations not yet adopted**

A number of new standards and amendments to standards are effective for annual periods beginning after 1 January 2022 with earlier application permitted. However, the Company has not early adopted the new or amended standards in preparing these financial statements.

The following amended standards and interpretations are not expected to have a significant impact on the Company's financial statements.

- Onerous contracts – Cost of Fulfilling a Contract (Amendments to IAS 37)
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12)
- COVID-19-Related Rent Concessions beyond 30 June 2021 (Amendment to IFRS 16)
- Property, Plant and Equipment: Proceeds before Intended Use (Amendments to IAS 16 Property, Plant and Equipment).
- Reference to Conceptual Framework (Amendments to IFRS 3).
- Classification of Liabilities as Current or Non-current (Amendments to IAS 1)
- IFRS 17 Insurance Contracts.
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2)
- Definition of Accounting Estimates (Amendments to IAS 8).

#### **4 Financial risk review**

This note presents information about the Company's exposure to financial risks. For information on the Company's financial risk management framework see Note 24.

##### **Credit risk - Amounts arising from ECL**

##### **Inputs, assumptions and techniques used for estimating impairment**

See accounting policy in Note 3(e)(iii).

##### ***Significant increase in credit risk***

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and expert credit assessment and including forward-looking information.

The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- the remaining lifetime probability of default (PD) as at the reporting date; with
- the remaining lifetime PD for this point in time that was estimated at the time of initial recognition of the exposure (adjusted where relevant for changes in prepayment expectations).

##### ***Credit risk grades***

The Company allocates each exposure to a credit risk grade based on a variety of data that is determined to be predictive of the risk of default and applying experienced credit judgement. Credit risk grades are defined using qualitative and quantitative factors that are indicative of risk of default. These factors vary depending on the nature of the exposure and the type of borrower.

Credit risk grades are defined and calibrated such that the risk of default occurring increases exponentially as the credit risk deteriorates so, for example, the difference in risk of default between credit risk grades 1 and 2 is smaller than the difference between credit risk grades 2 and 3.

Each exposure is allocated to a credit risk grade on initial recognition based on available information about the borrower. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade. The monitoring typically involves use of the following data.

<b>Corporate exposure</b>	<b>All exposures (corporate and retail exposures)</b>
<ul style="list-style-type: none"> <li>• Information obtained during periodic review of borrower files – e.g. audited financial statements, management accounts, budgets and projections;</li> <li>• Data from credit reference agencies, press articles, changes in external credit ratings;</li> <li>• Quoted bond and credit default swap (CDS) prices for the issuer where available;</li> <li>• Actual and expected significant changes in the political, regulatory and technological environment of the borrower or in its business activities.</li> </ul>	<ul style="list-style-type: none"> <li>• Payment record – this includes overdue status;</li> <li>• Requests for and granting of forbearance;</li> <li>• Existing and forecast changes in business, financial and economic conditions.</li> </ul>

#### *Generating the term structure of PD*

Credit risk grades are a primary input into the determination of the term structure of PD for exposures. The Company collects performance and default information about its credit risk exposures analysed by jurisdiction or region and by type of product and borrower as well as by credit risk grading.

For some portfolios, information purchased from external credit reference agencies is also used.

The Company employs statistical models to analyse the data collected and generate estimates of the remaining lifetime PD of exposures and how these are expected to change as a result of the passage of time.

This analysis includes the identification and calibration of relationships between changes in default rates and changes in key macro-economic factors as well as in-depth analysis of the impact of certain other factors (e.g. forbearance experience) on the risk of default. For most exposures, key macro-economic indicator is likely to be GDP growth.

The Company uses expert judgment in assessment of forward-looking information. This assessment is based also on external information (see discussion below on incorporation of forward-looking information). The Company then uses these forecasts to adjust its estimates of PDs.

To determine the internal credit rating of a counterparty that does not have an external credit rating assigned by the international agencies Standard & Poor's, Fitch Ratings and Moody's Investors Service, the Company uses expert judgement to determine the rating, taking into account the counterparty's specific characteristics including 10 factors such as profitability, liquidity, leverage, country risk, industry characteristics, nature of business, concentration risk, legal regulation, internal data and debts.

#### *Determining whether credit risk has increased significantly*

The criteria for determining whether credit risk has increased significantly vary by portfolio and include both quantitative changes in PDs and qualitative factors, including a backstop based on delinquency.

Using its expert credit judgment and, where possible, relevant historical experience, the Company may determine that an exposure has undergone a significant increase in credit risk if particular qualitative factors indicate so and those indicators may not be fully captured by its quantitative analysis on a timely basis.

As a backstop, the Company considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due. Days past due are determined by counting the number of days since the earliest elapsed due date in respect of which full payment has not been received. Due dates are determined without considering any grace period that might be available to the borrower.

#### *Definition of default*

The Company considers a financial asset to be in default when:

- the counterparty is unlikely to pay its credit obligations to the Company in full; or
- there is a delay in payments of 90 days and more as at the reporting date;

- there is a delay in payments of 7 days and more on interbank claims and securities as at the reporting date;
- the financial instrument has been restructured due to the borrower's financial difficulties, which resulted in decrease in the net present value of the operating cash flows by 10% and more;
- according to information from the publicly available information sources the counterparty is in the state of bankruptcy;
- the external credit rating of the financial instrument/counterparty is CC- (hereinafter according to the rating scales of Standard&Poor's, Moody's, etc.);
- at the current reporting date the Company has defaulted on another financial instrument of the counterparty;
- other indicators which evidence the counterparty's impaired ability to fulfil its financial liabilities to the Company and deterioration of the state of financial asset/increased probability of fulfilment by the Company of the contingent liabilities.

In assessing whether a borrower is in default, the Company considers indicators that are:

- qualitative – e.g. breaches of covenant;
- quantitative – e.g. overdue status and non-payment on another obligation of the same issuer to the Company; and
- based on data developed internally and obtained from external sources.

Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances.

#### *Incorporating of forward-looking information*

The Company incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL. The Company uses expert judgment in assessment of forward-looking information. This assessment is based also on external information. External information may include economic data and forecasts published by governmental bodies and monetary authorities in the countries where the Company operates, such as the Ministry of National Economy of the Republic of Kazakhstan, the National Bank of the Republic of Kazakhstan and selected private sector and academic forecasters.

#### *Modified financial assets*

The contractual terms of a loan agreement may be modified for a number of reasons, including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the borrower. An existing loan whose terms have been modified may be derecognised and the renegotiated loan recognised as a new instrument at fair value in accordance with the accounting policy set out in Note 3(e)(iii).

When the terms of a financial asset are modified and the modification does not result in derecognition, the determination of whether the asset's credit risk has increased significantly reflects comparison of:

- its remaining lifetime PD at the reporting date based on the modified terms; with
- the remaining lifetime PD estimated based on data on initial recognition and the original contractual terms.

When modification results in derecognition, a new loan is recognised and allocated to Stage 1 (assuming it is not credit-impaired at that time). The Company renegotiates loans to customers in financial difficulties (referred to as ‘forbearance activities’) to maximise collection opportunities and minimise the risk of default. Under the Company’s forbearance policy, loan forbearance is granted on a selective basis if the debtor is currently in default on its debt or if there is a high risk of default, there is evidence that the debtor made all reasonable efforts to pay under the original contractual terms and the debtor is expected to be able to meet the revised terms.

The revised terms usually include extending the maturity, changing the timing of interest payments and amending the terms of loan covenants. Both retail and corporate loans are subject to the forbearance policy.

For financial assets modified as part of the Company’s forbearance policy, the estimate of PD reflects whether the modification has improved or restored the Company’s ability to collect interest and principal and the Company’s previous experience of similar forbearance action. As part of this process, the Company evaluates the borrower’s payment performance against the modified contractual terms and considers various behavioural indicators.

Generally, forbearance is a qualitative indicator of a significant increase in credit risk and an expectation of forbearance may constitute evidence that an exposure is credit-impaired (see Note 3(e)(iii)) /in default. A customer needs to demonstrate consistently good payment behaviour over a period of time before the exposure is no longer considered to be credit-impaired/ in default or the PD is considered to have decreased such that the loss allowance reverts to being measured at an amount equal to 12-month ECL.

#### *Measurement of ECL*

The key inputs into the measurement of ECL are the term structure of the following variables:

- probability of default (PD);
- loss given default (LGD);
- exposure at default (EAD).

ECL for exposures in Stage 1 is calculated by multiplying the 12-month PD by LGD and EAD. Lifetime ECL is calculated by multiplying the lifetime PD by LGD and EAD.

The methodology of estimating PDs is discussed above under the heading “Generating the term structure of PD”.

The Company estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, counterparty industry and recovery costs of any collateral that is integral to the financial asset. For loans secured by retail property, LTV ratios are a key parameter in determining LGD.

Exposure at default represents the expected exposure in the event of a default. The Company derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract including amortisation. The EAD of a financial asset is the gross carrying amount. For lending commitments and financial guarantees, the EAD includes the amount drawn, as well as potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts.

As described above, and subject to using a maximum of a 12-month PD for financial assets for which credit risk has not significantly increased as from the time of initial recognition, the Company will measure ECLs considering the risk of default over the maximum contractual period (including any extension options) over which it is exposed to credit risk, even if, for risk management purposes, the Company considers a longer period. The maximum contractual period extends to the date at which the Company has the right to require repayment of a loan or terminate a loan commitment or guarantee.

Where modelling of a parameter is carried out on a collective basis, the financial instruments are grouped on the basis of shared risk characteristics that include:

- instrument type;
- credit risk gradings;
- collateral type;
- date of initial recognition;
- remaining term to maturity;
- financing program

The groupings must be subject to regular review to ensure that exposures within a particular group remain appropriately homogeneous.

For portfolios in respect of which the Company has limited historical data, external benchmark information will be used to supplement the internally available data. The portfolios for which external benchmark information represents a significant input into measurement of ECLs are as follows.

KZT'000	Exposure	External benchmarks used	
		PD	LGD
Cash and cash equivalents	100,684,841	Moody's default study Probability of default model	For local credit exposures
Placements with banks and other financial institutions	80,722,166		LGD statistics is based on
Investment securities measured at amortised cost	928,960,811		recovery after defaults of banks and financial institutions in
Other financial assets	35,926		Kazakhstan

## 5 Net interest income

	2021 KZT'000	2020 KZT'000
<b>Interest income calculated using effective interest rate method</b>		
<b>Financial assets measured at amortised cost</b>		
Investment securities measured at amortised cost	97,738,395	38,061,990
Loans to customers and long-term receivables from the sale of real estate in instalments	16,257,589	10,991,838
Placements with banks and other financial institutions	5,573,775	2,389,114
Reverse repurchase agreements	4,091,472	1,192,664
Cash and cash equivalents	1,137,831	555,453
Other assets	167,075	169,208
	<b>124,966,137</b>	<b>53,360,267</b>
<b>Other interest income</b>		
Finance lease receivables	13,544,235	10,981,807
Investment securities measured at fair value through profit or loss	281,466	235,921
Loans to customers measured at fair value through profit or loss	12,090	-
	<b>13,837,791</b>	<b>11,217,728</b>
<b>Interest expense</b>		
Debt securities issued	(82,337,804)	(32,276,294)
Other borrowed funds	(15,753,780)	(8,009,473)
	<b>(98,091,584)</b>	<b>(40,285,767)</b>
<b>Net interest income</b>	<b>40,712,344</b>	<b>24,292,228</b>

Interest income on finance lease receivables for the period ended 31 December 2021 comprises amortisation of government grants of KZT 8,073,752 thousand (2020: KZT 5,776,796 thousand) (Note 21).

## 6 Income/(losses) on impairment of debt financial instruments

	2021 KZT'000	2020 KZT'000
Loans to customers and long-term receivables from the sale of real estate in instalments (Note 15)	2,577,903	(6,744,798)
Investment securities measured at amortised cost (Note 14)	686,883	849,142
Cash and cash equivalents (Note 12)	1,405	13,540
Placements with banks and other financial institutions (Note 13)	2,668	(33,883)
Other assets	26,134	(23,666)
Finance lease receivables (Note 16)	(2,360,624)	(1,101,053)
	<b>934,369</b>	<b>(7,040,718)</b>

## 7 Net insurance premiums earned

	2021 KZT'000	2020 KZT'000
Fees under financial guarantee contracts for completion of construction (insurance premium)	2,131,502	297,364
Financial guarantee fees	851	117
	<b>2,132,353</b>	<b>297,481</b>

Fees under financial guarantee contracts for completion of construction recognised for the year ended 31 December 2021 arise from amortisation of fees received under guarantees related to construction companies, which are accounted for under IFRS 4 *Insurance Contracts*.

## 8 Other operating income

	2021 KZT'000	2020 KZT'000
Loss on recognition of initial discount on acquired long-term securities (Note 14)	(36,264,902)	(173,672,899)
Losses arising on initial recognition of loans issued	(2,123,013)	(93,612)
Investment property lease expenses	(475,789)	(315,619)
Net loss related to real estate operation	(402,668)	(85,606)
Loss on derecognition of financial assets measured at amortised cost	(349,936)	(27,967)
Income from utilisation of government grants (Note 21)	36,877,285	177,661,633
Income from early repayments of placements with banks and other financial institutions (Note 13)	3,073,529	-
Investment property lease income	836,268	378,560
Gain on sales of investment property	386	-
Other (expenses)/income	(19,579)	43,925
	<b>1,151,581</b>	<b>3,888,415</b>

During 2021, the Company recognised loss of KZT 2,123,013 thousand on initial recognition of value of loans issued to the employees at the below-market rates and refinancing of mortgage loans acquired from Bank of Astana JSC. The amount comprises expense of KZT 1,051,186 thousand incurred on initial recognition of loans issued to the employees and expense of KZT 1,071,827 thousand on refinancing of mortgage loans.

During the reporting year the Company purchased local government bonds in the amount of KZT 258,260,312 thousand with maturity in 2023, 2031-2032 (Note 14). On initial recognition, the difference between the fair value and the acquisition cost in the form of discount amounted to KZT 36,264,902 thousand, which was compensated by the use of government grant in the equivalent amount.

## 9 Personnel expenses

	<b>2021</b> <b>KZT'000</b>	<b>2020</b> <b>KZT'000</b>
Employee compensation	2,354,720	1,834,547
Salary related taxes	235,147	192,314
	<b>2,589,867</b>	<b>2,026,861</b>

## 10 General and administrative expenses

	<b>2021</b> <b>KZT'000</b>	<b>2020</b> <b>KZT'000</b>
Outsourcing expenses	415,110	239,921
Maintenance and repair of property, plant and equipment and intangible assets	358,654	374,537
Depreciation and amortisation	298,061	217,831
Taxes other than income tax	165,151	69,884
Advertising and marketing	117,705	110,419
Rating assignment/supervision/maintenance expenses	93,307	45,657
Communication services	75,645	42,021
Auditor's fee	62,570	41,696
Information services	56,117	10,361
Transportation services	50,175	38,675
Social program expenses	49,746	44,869
Business travel	48,361	25,372
Consulting services	43,988	30,342
Board of Directors expenses	22,693	19,196
Security	14,345	12,822
Rent	11,379	24,490
Materials	9,378	10,920
Employee training and advanced training - external	8,636	6,380
Stationery and printing	6,716	8,148
Health and safety costs	3,648	2,678
State Centre for Pension Payments' services expenses	2,773	2,207
Insurance expenses	520	537
Other	55,598	236,784
	<b>1,970,276</b>	<b>1,615,747</b>

## 11 Income tax expense

	<b>2021</b> <b>KZT'000</b>	<b>2020</b> <b>KZT'000</b>
Current year tax expense	-	7,787
Movement in deferred tax assets/deferred tax liabilities due to origination and reversal of temporary differences and movement in valuation allowance	(3,895,916)	(2,201,883)
<b>Total income tax expense</b>	<b>(3,895,916)</b>	<b>(2,194,096)</b>

In 2021, the applicable tax rate for current and deferred tax was 20% (2020: 20%).

**Reconciliation of effective tax rate for the year ended 31 December:**

	2021		2020	
	KZT'000	%	KZT'000	%
<b>Profit before income tax</b>	<b>9,070,527</b>	<b>100</b>	<b>8,245,774</b>	<b>100</b>
Income tax at the applicable tax rate	(1,814,105)	(20)	(1,649,155)	(20)
Non-taxable interest income on securities	4,554,652	50	1,805,172	22

In accordance with the certificate of ownership and merger of 30 July 2020, as a result of the takeover of DB JSC by the Company, the Company recognised on the balance sheet investment securities measured at amortised cost, with carrying amount of KZT 556,349,483 thousand, which were transferred from DB JSC. These securities comprised bonds issued by the local executive bodies and Fincraft Group LLP. Bonds issued by the local executive bodies were accepted at a price of KZT 1,000 per unit, totalling 581,915,804 thousand; a discount calculated using market interest rates varying from 8.67% p.a. to 13.99% p.a. totalled KZT 117,770,171 thousand. Bonds issued by Fincraft Group LLP, with carrying amount of KZT 65,150,763 thousand were transferred totalling 65,000,000 units. On 24 December 2020, the bond issuer Fincraft Group LLP made a decision to partially repurchase bonds, and on 5 January 2021, bonds of KZT 62,301,927 thousand were partially repurchased by the bond issuer.

During the year ended 31 December 2021, bonds issued by Fincraft Group LLP were repurchased in full by the issuer once the bonds reached maturity.

During the reporting year, the Company acquired 258,260,312 bonds issued by local executive bodies at a price of KZT 1,000 per bond, which mature in 2023 and 2031-2032. The bond coupon rates were 4.25% p.a., 6.10% p.a., and 7.10% p.a. The bonds were recognised at the fair value of KZT 221,995,410 thousand; a discount on initial recognition was KZT 36,264,902 thousand calculated using market interest rates ranging from 9.34% to 11.41% p.a. The discount was recognised in other operating expenses in the statement of profit or loss and other comprehensive income (Note 8).

During the reporting year ended 31 December 2021, the local executive bodies redeemed bonds totalling KZT 201,451,218 thousand. The discount recalculated after the partial/full redemption of bonds before the maturity date by the local executive bodies totalled KZT 2,607,192 thousand and was recognised as government grants (Note 21).

A loss of KZT 36,264,902 thousand recorded as a discount on the difference between the nominal and fair values of the purchased LEB bonds was offset by decreasing the liability on a government grant that was provided to purchase these bonds of KZT 36,877,285 thousand (Note 21).

As at 31 December 2021, corporate bonds consist of interest-bearing securities issued by local companies and banks. These securities are traded freely on Kazakhstan Stock Exchange ("KASE") except for bonds issued by Kazakhstan Kagazy JSC ("KK") with the gross carrying amount of KZT 1,117,796 thousand (31 December 2020: bonds issued by KK and Corporation APK Invest LLC with the gross carrying amount of KZT 1,117,796 thousand and KZT 984,930 thousand, respectively).

As at 31 December 2021 and 2020, the Company considers these bonds to be fully impaired, as the Company believes, based on its assessment of the issuers' financial position, that future cash flows are no longer expected to occur on these assets.

During the year ended 31 December 2021, the Company acquired mortgage loan portfolios from three commercial banks totalling KZT 1,306,844 thousand (2020: no purchase).

In accordance with the Instruction No. 11-04/05-2966 given by the Deputy Prime Minister of the Republic of Kazakhstan R.V. Sklyar of 2 December 2021, issued in pursuance of the Decree No. 21-5221 of the President of the Republic of Kazakhstan K.K. Tokayev of 4 December 2021, relevant government agencies were tasked with elaborating the issue to finance the G4 City urban development project in the Almaty region, including development of the G4 City land plots, through extending credit to CG Land LLP.

According to the extract from the Minutes of the Meeting of the State Commission on the Issues of Modernisation of the Economy of the Republic of Kazakhstan No. 17-04/11-42 of 15 December 2021, a decision was adopted to finance the G4 City urban development investment project from the Company's funds totalling up to KZT 31.1 billion.

In accordance with the Decree of the Government of the Republic of Kazakhstan No. 918 of 23 December 2021 ( the “Decree”), the Decree of the Government of the Republic of Kazakhstan No. 6 of 13 January 2009 “On Approving the Action Plan to Implement the Joint Action Plan of the Government of the Republic of Kazakhstan, the National Bank of the Republic of Kazakhstan and the Agency of the Republic of Kazakhstan on Regulation and Supervision of Financial Market and the Financial Organizations Intended to Stabilize the Economy and Financial System for 2009-2010” was amended. In accordance with the amended Decree, the Company's funds that have been early withdrawn from the bank deposit held with Halyk Savings Bank of Kazakhstan JSC (the current name “Halyk Bank of Kazakhstan JSC”) were partially allocated to finance the G4 City urban development project in the Almaty region, through providing funds to CG Land LLP totalling KZT 13.2 billion.

In December 2021, the Company provided two KZT- denominated tranches of long-term loans issued to CG Land LLP, totalling KZT 31,100,000 thousand. The loans bear nominal rates of 1.00% and 11.43% per annum, and mature in 2028 and 2029, respectively. The Company pledged a 200-hectare land plot in the Almaty region as collateral securing the performance of its obligations.

The money received by CG Land LLP from the Company was not fully used to finance the urban development investment project as planned. The major portion of funds was used other than for financing the G4 City project in the Almaty region, but to repay the outstanding loan received from Halyk Bank of Kazakhstan JSC.

Management assessed that contractual cash flows were not solely payments of principal and interest on the principal amount outstanding (the “SPPI criterion”) on these loans and designated it as measured at fair value through profit or loss.

The fair value of these loans on initial recognition was measured as the present value of all future cash flows discounted using a market interest rate of 23.74% per annum. The difference between the nominal and fair value of the loans at the date of initial recognition of KZT 27,512,212 thousand was recognised in the statement of profit or loss and other comprehensive income in the caption ‘Loss on initial recognition of loans to customers measured at fair value through profit or loss’.

**(a) Credit quality of mortgage loans and long-term receivables from sale of property to individuals under instalment agreements**

The following table provides information on the credit quality of mortgage loans to customers as at 31 December 2021 and 31 December 2020:

KZT'000	31 December 2021				Total
	12-month ECL	Lifetime ECL - not credit-impaired	Lifetime ECL - credit-impaired	Acquired assets, credit-impaired on initial recognition	
- not overdue	62,644,364	1,052,396	4,182,292	41,027	67,920,079
- overdue up to 30 days	1,974,246	713,466	289,419	32,511	3,009,642
- overdue 30-89 days	-	918,419	443,714	12,829	1,374,962
- overdue 90-179 days	-	-	605,246	-	605,246
- overdue 180-360 days	-	-	297,520	-	297,520

	<b>67,192,070</b>	<b>4,108,124</b>	<b>9,756,089</b>	<b>188,896</b>	<b>81,245,179</b>
Loss allowance	(3,938,914)	(473,743)	(3,970,716)	(188,896)	(8,572,269)
<b>Carrying amount</b>	<b>63,253,156</b>	<b>3,634,381</b>	<b>5,785,373</b>	<b>-</b>	<b>72,672,910</b>

As at 31 December 2021, the carrying amount of loans with the seller's full-recourse option was KZT 4,036,481 thousand, and loans with the seller's partial-recourse option were nil (31 December 2020: KZT 10,842,108 thousand and KZT 436,972 thousand, respectively).

In accordance with partial-recourse agreements, the recourse option does not exceed 20% of the total principal amount of mortgage loans at the date of purchase of those loans.

***Key assumptions and judgements used to estimate loss allowance for mortgage loans and long-term receivables from sale of property to individuals under instalment agreements***

In determining the loss allowance for mortgage loans and long-term receivables from sale of property to individuals under instalment agreements management used the following key assumptions:

- The 12-month PDs for groups of segments classified to Stage 1 exposures were estimated at 2.8% - 27.2%; the lifetime PDs for groups of segments classified to Stage 2 exposures were estimated at 5.1% - 79.3%, depending on the group of segments of the homogeneous mortgage portfolio.
- The LGD parameters for the segments of the homogeneous mortgage portfolio classified to Stages 1 and 2 exposures were estimated from 0% to 44.9%, depending on the segments of the homogeneous mortgage portfolio.

Changes in these estimates could affect the loss allowance for mortgage loans and long-term receivables from sale of property to individuals under instalment agreements. For example, to the extent that the net present value of the estimated cash flows differs by plus/minus three percent, the loss allowance for mortgage loans and long-term receivables from sale of property to individuals under instalment agreements as at 31 December 2021 would be KZT 2,124,671 thousand lower/higher (31 December 2020: KZT 2,180,187 thousand).

**(b) Analysis of movements in loss allowance for mortgage loans and long-term receivables from sale of property to individuals under instalment agreements**

Movements in the loss allowance are as follows:

	<b>For the year ended 31 December 2021</b>				<b>Total KZT'000</b>
	<b>12-month ECL</b>	<b>Lifetime ECL – not credit- impaired</b>	<b>Lifetime ECL – credit- impaired</b>	<b>POCI</b>	
Impairment allowance as at the beginning of the period	3,938,914	473,743	3,970,716	188,896	8,572,269

**(c) Analysis of collateral of mortgage loans and long-term receivables from sale of property to individuals under instalment agreements**

Mortgage loans are secured by the underlying real estate properties.

For loans with the seller's recourse option, the commercial banks-partners are responsible for periodically monitoring collateral according to the requirements of the NBRK. The recoverability of these loans is primarily dependent on the creditworthiness of the commercial banks-partners rather than the value of collateral, and the current value of the collateral has lesser impact on the impairment assessment.

The following tables provide information on the fair value of collateral securing mortgage loans (net of impairment allowance):

KZT'000	Carrying amount of loans to customers	Fair value of collateral: for collateral assessed as of the reporting date	Fair value of collateral: for collateral assessed as of loan inception date	Fair value of collateral not determined
<b>31 December 2021</b>				
Not credit-impaired loans	65,852,152	45,054,776	20,797,376	-
Credit-impaired loans	4,970,199	3,809,671	1,160,528	-
	<b>70,822,351</b>	<b>48,864,447</b>	<b>21,957,904</b>	<b>-</b>
<b>31 December 2020</b>				
Not credit-impaired loans	66,887,537	60,941,514	2,394,154	3,551,869
Credit-impaired loans	5,785,373	2,488,519	1,160,607	2,136,247
	<b>72,672,910</b>	<b>63,430,033</b>	<b>3,554,761</b>	<b>5,688,116</b>

The tables above exclude overcollateralisation.

The Company updates the appraised collateral values obtained at inception of the loan to the present value considering the approximate changes in the value of properties. The Company may also obtain a specific individual valuation of collateral at each reporting date where there are indications of impairment.

*Repossessed collateral*

The Company obtains certain assets by taking possession of collateral for loans to retail customers. As at 31 December 2021, the carrying amount of such assets was KZT 222,755 thousand (2020: KZT 222,755 thousand).

The Company's policy is to sell these assets within a very short time.

**(d) Credit quality of loans to customers and long-term receivables from sale of property to legal entities under instalment agreements**

<b>Total loans issued and receivables from sale of property under instalment agreements</b>	<b>39,908,011</b>	<b>27,245,018</b>	<b>501,380</b>	<b>67,654,409</b>
Loss allowance	(2,553,827)	(2,261,569)	(219,253)	(5,034,649)
	<b>37,354,184</b>	<b>24,983,449</b>	<b>282,127</b>	<b>62,619,760</b>

During the period ended 31 December 2021, Mega Plaza LLP repaid principal and interest of KZT 1,441,752 thousand (2020: KZT 1,357,077 thousand).

Sale of apartments located on the grounds of ISE EXPO-2017 to individuals and legal entities under instalment agreements provides for that long-term receivables are to be secured by the sold real estate (apartments, parking lots) registered as collateral.

By-instalments sale to individuals is subject to the following terms: an initial contribution makes up at least 20% of the loan value; a guarantee deposit makes up at least three monthly payments; the loan carries an annual interest rate of 3% and matures in 12 years; the contract provides for an early partial repayment and early full repayment of the loan, without a commission fee being charged.

By-instalments sale to legal entities is subject to the following terms: a loan carries an annual interest rate of 2% and matures in 10 years; the contract provides for an early partial repayment and early full repayment of the loan, without a commission fee being charged.

To discount cash flows from instalment contracts concluded with individuals, the Company uses an average interest rate applied by second-tier banks for mortgage loans to individuals, using a market interest rate of 14.3% on initial recognition.

To discount cash flows from instalment contracts concluded with legal entities, the Company uses the statistics of the RSE “National Bank of the RK” on long-term loans issued to banks, by types of economic activities in education for August 2019, and uses a market interest rate of 14.02% on initial recognition.

After the takeover of BD JSC by the Company, the special-purpose loan agreements signed by and between Yelorda Kurylys Companiyasy LLP and the City Administration of Nur-Sultan city, intended to allocate funds from the National Fund of the Republic of Kazakhstan for financing the completion of the troubled housing construction projects in Nur-Sultan under the Nurly Zher Programme, were transferred to the Company. The City Administration of Nur-Sultan city (Akimat) guarantees the performance of obligations by Yelorda Kurylys Companiyasy LLP to the Company under the special-purpose loan agreement, including repayment of principal amount and interest.

As at 31 December 2021, loans issued and long-term receivables from legal entities were not overdue, except long-term receivables from NCO ‘Umit Fund’ of KZT 568,175 thousand overdue 492 days (31 December 2020: of KZT 501,380 thousand overdue 118 days).

A loan issued to Mega Plaza LLP was secured by underlying real estate (shopping and entertainment centre in Nur-Sultan city), which market value exceeded the loan carrying amount.

The movement in the balances of loss allowance for loans issued and receivables from sale of property to legal entities under instalment agreements are as follows:

KZT'000	31 December 2021

<i>Loans and long-term receivables from sale of property to legal entities under instalment agreements</i>					
Balance at the beginning of the year	-	-	-	-	
Originated as a result of the merger with BD JSC (Note 27)	90,303	2,486,685	-	2,576,988	
Net remeasurement of loss allowance	2,463,525	(225,116)	219,252	2,457,661	
<b>Balance at the end of the year</b>	<b>2,553,828</b>	<b>2,261,569</b>	<b>219,252</b>	<b>5,034,649</b>	

***Key assumptions and judgements used to estimate loss allowance for loans and long-term receivables from sale of property to legal entities under instalment agreements***

In determining the loss allowance for loans and long-term receivables from sale of property to legal entities under instalment agreements, management used the following key assumptions:

- A delay in obtaining proceeds from the foreclosure of collateral for receivables under instalment agreement with Mega Plaza LLP is 36 months.
- The LGD parameters for loans and long-term receivables categorised into Stages 1 and 2 credit exposures were estimated at 36.6% to 57.7%.
- The LGD parameter for long-term receivables from sale of apartments under the agreement with the non-profit organisation ‘Umit Fund’, categorised into Stage 3 credit exposures was estimated at 43.7%.
- The PD on the loan classified into Stage 1 credit exposures was estimated at 0.26% and for receivables classified to Stage 1 and Stage 2 credit exposures – from 8.5% to 55.5%, depending on a borrower’s internal rating.

Changes in these estimates could affect the loss allowance for expected credit losses on loans. For example, to the extent that the net present value of the estimated cash flows differs by plus/minus one percent, the loss allowance for loans and long-term receivables from sale of property to legal entities under instalment agreements as at 31 December 2021 would be KZT 648,270 thousand lower/higher (31 December 2020: KZT 626,198 thousand).

At the reporting date, the Company’s estimates of the loss allowance were adjusted as follows:

- 1) In determining the loss allowance for the loan to Yelorda Kurylyys Companiyasy LLP, the guarantee provided by the Akimat of Nur-Sultan city was considered, resulting in a significant decrease in expected credit losses on Stage 1 exposures.
- 2) Assessment of collateral pledged to secure the receivables under the instalment agreement with Mega Plaza LLP resulted in an increase in expected credit losses on Stage 2 exposures.

*Incorporation of forward-looking information*

The Company incorporates forward-looking information into both the assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and the measurement of ECL. The Company uses expert judgement in assessment of forward-looking information. This assessment is based on the information from external sources.

External information may include economic data and forecasts published by governmental bodies and monetary authorities in the countries where the Company operates, such as the NBRK and Ministry of National Economy, and selected private sector and academic forecasters.

The Company has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

Considering that the Company's historical data on default rates are not sufficient, the Company uses data from rating agencies as inputs for the economic scenarios. Scenarios are regularly reviewed and are used to assess credit risk grades.

Projected ratios of key indicators, default events and loss rates on various portfolios of financial assets have been developed based on the rating agencies' studies over the past 30-40 years.

**(e) Asset securitisation**

As at 31 December 2021 and 2020, no loans to customers or loans purchased from partners were pledged as collateral to secure debt securities issued by the Company.

**(f) Loan maturities**

The maturity of the Company's loan portfolio as at the reporting date is presented in Note 24(e), which shows the remaining period from the reporting date to the contractual maturity of the loans.

## 16 Finance lease receivables

The components of net investments in finance lease as at 31 December 2021 and 31 December 2020 are as follows:

<b>KZT'000</b>	<b>31 December 2021</b>	<b>31 December 2020</b>
Less than 1 year	13,224,021	13,358,281

<b>Net investment in finance lease, total</b>	<b>153,630,813</b>	<b>164,270,564</b>

The Company leases out housing real estate under Nurly Zher Programme and Own Programme.

These lease agreements are classified as finance lease under IFRS 16 because ownership of the assets gets transferred to lessees by the end of the lease term, and at the inception the present value of the minimum lease payments amounts to substantially all of the fair value of the leased assets.

The finance lease agreements under Own Programme have a maturity term up to 20 years and bear nominal interest rates of 11.50% and 13.00%. The finance lease agreements for Nurly Zher Programme have a maturity term of 20 years and monthly lease payments limited to KZT 1,120 per square meter for Almaty and Astana cities and KZT 924 per square meter in other regions. The interest rate implicit in the lease agreements under Nurly Zher Programme is 3.1%.

#### Analysis of collateral

The following tables provides information on collateral, leased assets and other credit enhancements related to finance lease receivables (net of loss allowance) as at 31 December 2021 and 2020, by types of collateral:

KZT'000	Carrying amount of finance lease receivables	Fair value of collateral - for collateral assessed as of reporting date	Fair value of collateral - for collateral assessed as of loan inception date	Fair value of collateral not determined
<b>31 December 2021</b>				
Not impaired finance lease receivables	142,129,786	142,129,786	-	-
Impaired finance lease receivables	11,501,027	11,501,027	-	-
	<b>153,630,813</b>	<b>153,630,813</b>	-	-
<b>31 December 2020</b>				
Not impaired finance lease receivables	152,557,993	152,557,993	-	-
Impaired finance lease receivables	11,712,571	11,712,571	-	-
	<b>164,270,564</b>	<b>164,270,564</b>	-	-

The tables above exclude overcollateralisation.

The Company has no finance lease receivables, for which the fair value of collateral was assessed at the loan inception date and it was not updated for further changes, and finance lease receivables for which the fair value of collateral is not determined. Information on the valuation of collateral is based on when this estimate was made, if any.

The recoverability of finance lease receivables which are neither past due nor impaired primarily depends on the creditworthiness of lessees rather than the value of collateral, and the Company does not necessarily update the valuation of collateral as at each reporting date.

#### (a) Credit quality of finance lease receivables

The following table provides information on the credit quality of finance lease receivables as at 31 December 2021 and 31 December 2020:

KZT'000	31 December 2021			Total
	12-month expected credit losses	Lifetime ECL on assets not credit-impaired	Lifetime ECL on credit- impaired assets	
- not overdue	126,597,218	6,659,817	3,134,500	136,391,535

## 17 Assets to be transferred under finance lease agreements

Assets to be transferred under finance lease agreements comprise the residential complexes purchased and constructed by the Company during the reporting period, which the Company is planning to transfer to the lessees in 2022.

The major portion of the assets relates to assets to be transferred under Nurly Zher Programme.

During 2021, the largest micro-district housing complexes acquired by the Company are located in the city of Nur-Sultan of KZT 1,218,271 thousand (in 2020: micro-district housing complexes located in the cities of Nur-Sultan, Karaganda of KZT 2,652,601 thousand).

## 18 Construction in progress

Construction-in-progress comprises capitalised costs incurred by the Company under the construction projects of residential real estate in different regions of Kazakhstan. The Company lease out the constructed housing estate in accordance with the terms established by the Nurly Zher Programme, through signing the finance lease contracts.

As at 31 December 2021, the large construction project is the project located in the city of Nur-Sultan worth of KZT 811,035 thousand (in 2020: the project located in the 14th micro-district of Karaganda city worth KZT 1,099,726 thousand).

## 19 Debt securities issued

Debt securities issued as at 31 December 2021 and 31 December 2020 comprised KZT-denominated bonds.

				<b>755,618,219</b>	<b>738,066,735</b>

During the year ended 31 December 2021, with a view to attracting investments to redeem the debt securities of the local executive authorities issued to develop the infrastructure and business in the regions as part of implementation of the Employment Roadmap for 2020-2021, the Company issued 500,000,000 bonds traded at Kazakhstan Stock Exchange (KASE), at the price of KZT 1,000 per bond, with a 10-year maturity. The bond coupon rate is 7.02% per annum. Interest is paid once a year. The bonds were recognised on the Company's balance sheet at fair value of KZT 38,900,500 thousand calculated using the market rate of 10.75% per annum, where the difference between the nominal value and fair value was recognised as a government grant, and used to buy the bonds issued by the local executive bodies (Note 21).

During the year ended 31 December 2021, the Company made amendments to the prospectus of the third issue of bonds in terms of increase the maturity from two years to four years, starting from the date of beginning of the maturity period. The bonds were recognised at fair value calculated using the market rate of 10.64% per annum, and the difference between the nominal value and fair value of 14,699,851 thousand was recognised as a government grant, which is planned to be used during 2022 (Note 21).

During the year ended 31 December 2021, in accordance with the Program for Refinancing Mortgage Housing Loans (Mortgage Loans) approved by the Resolution No.69 of the Management Board of the National Bank of Kazakhstan dated 24 April 2015, the Company placed coupon bonds in the amount of KZT 1,303,774 thousand at a fixed rate of 0.1% per annum. The bonds were recognised at fair value of KZT 67,496 thousand, calculated using the market rate of 11.07% per annum, and the difference between the par value and fair value of KZT 1,236,278 thousand was recognised as a government grant (Note 21).

During the reporting period the Company early repaid the principal amount of issued bonds of KZT 65,000,000 thousand.

## 20 Other borrowed funds

	<b>2021</b>	<b>2020</b>
	<b>KZT'000</b>	<b>KZT'000</b>
Loan from National Management Holding “Baiterek” JSC	192,013,579	203,134,956
Long-term loans received from international financial organisations	20,279,400	-
Due to the Government of the Republic of Kazakhstan	5,724,636	5,308,951
Due to Akimat of the city of Nur-Sultan	147,217	203,779
	<b><u>218,164,832</u></b>	<b><u>208,647,686</u></b>

As at 31 December 2021 and 31 December 2020, other borrowed funds comprised loans from the NMC “Baiterek” JSC received under the State Programme of Infrastructure Development “Nurly Zhol” for 2015-2019 adopted in accordance with the Edict of the President of the RK dated 6 April 2015, No.1030, and “Regions Development Programme till 2020” approved by the Decree No. 728 of the Government of the Republic of Kazakhstan dated 28 June 2014, which were integrated with the Programme of Housing Construction “Nurly Zher” with regard to construction and acquisition of the leased and credit housing properties. As set out in the Nurly Zher programme, the purpose of the loans is to finance construction and acquisition of housing real estate to be further leased out under finance lease contracts. The loans bear a nominal interest rate of 0.15% per annum and mature in January 2045, January 2046 and June 2046. The principal is repayable at maturity. On initial recognition the loans were recognised at fair value calculated by discounting the contractual future cash flows and applying the relevant estimated market interest rates ranging from 6.9% to 8.0%. The discount on these loans was recognised as a government grant (Note 16).

During 2021, the Company entered into additional agreements to extend the maturity of loans from the Parent Company based on the recommendations of the Council for National Fund Management of the Republic of Kazakhstan. Due to substantial modification of the terms and conditions of the agreements, the Company derecognised the old loans and recognised new financial liabilities. Accordingly, the loans were discounted to fair value at the date of signing of the additional agreements, using the market interest rates of 11.04% and 11.03% per annum, which resulted in recognition of the effect of modifications of the terms and conditions of KZT 20,430,465 thousand, net of deferred taxes, directly on the retained earnings accounts in equity, as management has determined that the Parent Company acted as a shareholder when provided the Company with said financing instruments at the below-market interest rates, without any additional conditions.

During 2021, to finance arrangements aimed at providing the population with the affordable housing and purchase bonds issued by the local executive bodies as part of the implementation of the state and government programmes, the Company raised loans denominated in Russian roubles from Eurasian Development Bank in the total amount of RUB 3,500,000 thousand bearing an annual interest rate of 7.5% and maturing in November and December 2026.

Amounts due to the Government of the Republic of Kazakhstan consist of a loan received in December 2007 from the Ministry of Finance of the Republic of Kazakhstan for the purchase of mortgage loans from second-tier banks. The loan carries a nominal interest rate of 0.1% per annum with principal repayable at maturity in December 2027. The fair value of the loan on initial recognition was estimated by discounting the contractual future cash flows of the loan using management’s estimate of a long-term market borrowing rate for the Company of 8% p.a.

In December 2020, in accordance with the loan agreement concluded between Akimat of Nur-Sultan city and the Company worth KZT 478,500 thousand, intended for purchase of apartments in Makhabbat-2 Residential Estate, for further on-credit sale of apartments to individuals at the interest rate of 3.1%. The loan carries a nominal interest rate of 0.15% per annum and matures in December 2037/

The loan was recognised on the Company’s balance sheet at fair value of KZT 203,456 thousand, calculated using the market rate of 10.13% per annum, and the difference of KZT 275,044 thousand between nominal and fair values was recognised as a government grant (Note 21).

During 2021 the Company signed an additional agreement to extend the maturities of the loans received from Akimat of the city of Nur-Sultan from seventeen years to thirty years. Due to substantial modification of the terms and conditions of the agreements, the Company derecognised the old loans and recognised new financial liability. Therefore, the loan was discounted to fair value as at the date of signing of the additional agreement, which resulted in recognition of the effect from modification of the terms and conditions in the amount of KZT 69,376 thousand as a government grant (Note 21).

Origination of a government grant in the form of discount on debt securities issued (Note 19)	27,035,629	185,533,819
Utilisation of a government grant for bonds of local executive bodies (Note 14)	(36,877,285)	(181,589,459)
Discount recalculated due to early partial redemption of bonds by the local executive bodies (Note 14)	2,607,192	200,474
Government grants originated on loans issued at low interest rates during the period as a result of the merger (Note 27)	-	100,868,263
Amortisation for the year	(8,073,752)	(5,776,796)
<b>Balance at the end of the year</b>	<b>182,324,636</b>	<b>197,563,476</b>

A government grant originated on the loan issued at a soft lending rate to purchase property item was KZT 69,376 thousand.

Government grant liabilities on financing Nurly Zher Programme and Employment Roadmap for 2020-2021 will be utilised as far as discount on purchase of local executive bodies' bonds at a low interest rate is recognised, and a part of government grants will be amortised in other income as interest under hire-purchase contracts, on a straight-line basis over the period of 20 years as far as finished flats are recorded on the Company's balance sheet.

## 22 Deferred income and provisions for guarantees issued

	<b>2021</b>	<b>2020</b>
	<b>KZT'000</b>	<b>KZT'000</b>
Deferred income from financial guarantee contracts under the construction projects	2,031,711	1,035,317
Deferred income on financial guarantees	731	33,425
<b>Total deferred income on financial guarantees</b>	<b>2,032,442</b>	<b>1,068,742</b>
Provision for losses incurred but not reported under contracts for guarantees for construction projects	16,369,499	12,386,342
Provision for claims on financial guarantees	1,141	1,483
<b>Total provision for guarantees issued</b>	<b>16,370,640</b>	<b>12,387,825</b>
<b>Balance at the end of the year</b>	<b>18,403,082</b>	<b>13,456,567</b>

### Deferred income on financial guarantees

	<b>2021</b>	<b>2020</b>
	<b>KZT'000</b>	<b>KZT'000</b>
Balance at beginning of the year	1,068,742	-
Earned commission from financial guarantee contracts related to construction projects (insurance premium)	(2,131,502)	(297,364)
Commission from financial guarantee contracts related to construction projects received	3,516,427	204,798
Financial guarantee commission earned	(851)	(117)
Financial guarantee commission	96	96
Financial guarantee commission written off	(31,837)	-
Commission from financial guarantee contracts related to construction projects, received as a result of the merger (Note 27)	-	1,139,377
Commission from financial guarantees received as a result of the merger	-	33,461
VAT payable on income	(388,633)	(11,509)
<b>Balance at the end of the year</b>	<b>2,032,442</b>	<b>1,068,742</b>

Deferred income on guarantees issued includes a proportion of financial guarantee fees and a proportion of the commissions for contracts for the provision of a completion guarantee for construction projects that are estimated to be earned in the next or subsequent financial years, calculated separately for each financial guarantee contract and each contract for the provision of guarantees for the project completion of construction, using a proportional method.

**Analysis of movements in provisions for claims on financial guarantees**

	<b>2021</b>	<b>2020</b>
	<b>KZT'000</b>	<b>KZT'000</b>
Balance at the beginning of the year	1,483	-
Movement in provisions under contracts for financial guarantees	(342)	798
Movements in provisions for financial guarantee contracts received as a result of the merger	-	685
<b>Balance at the end of the year</b>	<b>1,141</b>	<b>1,483</b>

**Analysis of movements in provisions for claims on financial guarantees under construction projects**

	<b>2021</b>	<b>2020</b>
	<b>KZT'000</b>	<b>KZT'000</b>
Balance at the beginning of the year	12,386,342	-
Movements in provisions under contracts for granting guarantees for construction projects	3,982,815	9,483,772
Movement in provisions under contracts for financial guarantees	342	-
Movements in provisions for financial guarantee contracts related to construction projects, received as a result of the merger (Note 27)	-	2,902,570
<b>Balance at the end of the year</b>	<b>16,369,499</b>	<b>12,386,342</b>

**Key assumptions used to calculate provisions under contracts for granting guarantees for construction projects**

Assumptions used to assess insurance assets and liabilities are adopted for more accurate estimation of reserves needed to cover any future liabilities for insurance contracts.

As of the reporting date, the Company created a reserve for the estimated amount necessary to fully settle the losses that were incurred as a result of the occurrence of insurance cases before that date, regardless of whether they were declared or not.

The assumptions are checked to ensure that they are consistent with observable market information or other published information. There is, however, a general lack of publicly available information on the Kazakhstan insurance market that would be relevant to identification of assumptions and sensitivities. The estimation of the reserve of incurred, but not reported losses usually involves a greater degree of uncertainty than an estimate of the provision for claims.

To determine the probability of occurrence of an insured event, the Company uses the assigned rating of an authorized company/developer, which determines the level of risk. The rating takes into account both the quantitative and qualitative indicators of the authorized company/developer: return on sales, return on assets, quick liquidity ratio, solvency ratio, interest coverage ratio, current-to-assets ratio, total liabilities to equity, commissioned square meters of the total area of housing, the category of license of the general contractor, technical equipment.

The factor indicating the increased probability of insured event to occur is the fact that the authorised company/a developer has applied to extend guarantee period due to delays in construction and assembly works and failure to meet apartment target sales.

Taking into account that fulfilment of obligations by the developer and construction company are secured by the pledged share of participation of the developer in the authorised company and the pledged land plot (rights to it), the amount of actual compensation in the event of an insurance case as assessed by the Company depend on the completion stage and value of construction project and changes in market prices of real property.

Estimation of expected losses is reassessed as the Company accumulates statistical data.

Management of the Company believes that the reserves on the portfolio of guarantee contracts for construction projects are sensitive, mainly to changes in the estimated probability of occurrence of an insurance case and estimated compensation in the event of an insurance case. The Company regularly reassesses its estimates based on the latest values of the above variables.

If a probability of occurrence of an insurance case changes by plus/minus one percent, the size of insurance reserves would be higher/lower by KZT 163,695 thousand (2020: KZT 123,863 thousand).

If the amount of estimated compensation in the event of an insurance case is changed by plus/minus 5% of the amount of the claim, the amount of insurance reserve would be lower/higher by KZT 811,363 thousand (2020: KZT 557,611 thousand).

## **23 Share capital and reserves**

### **(a) Issued share capital and share premium**

As at 31 December 2021 authorised share capital comprises 22,000,000 ordinary shares. (as at 31 December 2020: 22,000,000 ordinary shares). As at 31 December 2021 issued and outstanding share capital comprises 17,881,022 shares (2020: 17,881,022 shares), including treasury shares (Note (c) below).

### **(b) Dividends**

In accordance with Kazakhstan legislation the Company's distributable reserves are limited to the balance of retained earnings as recorded in the Company's financial statements prepared in accordance with International Financial Reporting Standards or profit for the year if there is an accumulated loss brought forward. A distribution cannot be made if this would result in negative equity or the Company's insolvency.

During the year ended 31 December 2021, dividends of KZT 6,051,678 thousand or KZT 343.24 per ordinary share were declared and paid, based on the Company's previous year results (2020: dividends in the amount of KZT 2,577,532 thousand or KZT 423.84 per ordinary share were declared and paid, based on the previous year results).

### **(c) Treasury shares**

As at 31 December 2021 and 2020 the Company held 250,000 of its own shares.

### **(d) Reserve capital**

The Company has established a reserve capital in accordance with a decision of shareholders. As at 31 December 2021 and 2020 the reserve capital was KZT 2,734,447 thousand. This reserve capital is not subject to distribution.

During the years ended 31 December 2021 and 2020 the shareholders made no transfers from retained earnings to the reserve capital.

### **(e) Other provisions in retained earnings**

The Company created a reserve for the settlement of the guarantee event, in accordance with Article 29 of the Law of the Republic of Kazakhstan dated April 7, 2016 "On Shared Participation in Housing Construction". The reserves for the settlement of guarantee cases can be used solely for the purpose of payments related to the Company's obligations under the guarantee agreements. As at 31 December 2021, provision for settlement of guarantee events was KZT 16,227,326 thousand (31 December 2020: KZT 11,152,219 thousand) and it is not subject to distribution.

**(f) Book value per share**

Under the listing rules of the KSE, the Company should present book value per share in its financial statements. The book value per share is calculated dividing net assets less intangible assets by the number of outstanding ordinary shares. As at 31 December 2021 the book value per share was KZT 12,451.01 (2020: KZT 11,340.87).

## **24 Risk management**

Management of risk is fundamental to the lending business and is an essential element of the Company's operations. The major risks faced by the Company are those related to interest rate and currency risks, credit risk and liquidity risk.

**(a) Risk management policies and procedures**

The Company's risk management policies aim to identify, analyse and manage the risks faced by the Company, to set appropriate risk limits and controls, and to continuously monitor risk levels and adherence to limits. Risk management policies and procedures are reviewed regularly to reflect changes in market conditions, bank products and services offered and emerging best practice.

The Board of Directors has overall responsibility for the oversight of the risk management framework, overseeing the management of key risks and reviewing its risk management policies and procedures as well as approving significantly large exposures.

The Management Board of the Company is responsible for monitoring and implementation of risk mitigation measures and making sure that the Company operates within the established risk parameters. The Head of Risk Department of the Company is responsible for the overall risk management and compliance functions, ensuring the implementation of common principles and methods for identifying, measuring, managing and reporting both financial and non-financial risks.

The Asset Liability and Risk Management Committee develops proposals on assets/liabilities and risk management based on strategies, policies and procedures approved by the Management Board and the Board of Directors.

Both external and internal risk factors are identified and managed throughout the Company's organisational structure. Particular attention is given to identifying the full range of risk factors and determination of the level of assurance over the current risk mitigation procedures. Apart from the standard credit and market risk analysis, Risk Management Department monitors financial and non-financial risks by holding regular meetings with operational units in order to obtain expert judgments in their respective areas of expertise. The Board of Directors on a regular basis examines reports on risks.

**(b) Market risk**

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises currency risk, interest rate risk and other price risks. Market risk arises from open positions in interest rate, currency and equity financial instruments, which are exposed to general and specific market movements and changes in the level of volatility of market prices.

The objective of market risk management is to manage and control market risk exposures within acceptable parameters, whilst optimising the return on risk.

Overall authority for market risk is vested in the Asset, Liability and Risk Management Committee.

The Company manages its market risk by setting open position limits in relation to financial instruments, interest rate maturity and currency positions and stop-loss limits. These are monitored on a regular basis and reviewed and approved by the Management Board and the Board of Directors.

**Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Interest margins may increase as a result of such changes but may also reduce or create losses in the event that unexpected movements occur.

**Interest rate gap analysis**

Interest rate risk is managed principally through monitoring interest rate gaps. A summary of the interest gap position for major interest-bearing financial instruments is as follows:

<b>KZT KZT'000</b>	<b>Less than 3 months</b>	<b>3-6 months</b>	<b>6-12 months</b>	<b>1-5 years</b>	<b>Over 5 years</b>	<b>Non-interest bearing</b>	<b>Carrying amount</b>

	2021		2020	
	KZT'000		KZT'000	
	Profit or loss	Equity	Profit or loss	Equity
100 bp parallel rise	2,997,674	2,997,674	1,597,675	1,597,675
100 bp parallel fall	(2,997,674)	(2,997,674)	(1,597,675)	(1,597,675)

An analysis of sensitivity of profit or loss and equity as a result of changes in the fair value of financial instruments at fair value through profit or loss and financial assets available-for-sale due to changes in the interest rates based on positions existing as at 31 December 2021 and 31 December 2020 and a simplified scenario of a 100 basis point (bp) symmetrical fall or rise in all yield curves is as follows:

	2021		2020	
	KZT'000		KZT'000	
	Profit or loss	Equity	Profit or loss	Equity
100 bp parallel rise	253,834	253,834	265,080	265,080
100 bp parallel fall	(103,365)	(103,365)	(296,967)	(296,967)

**(c) Currency risk**

The Company has assets and liabilities denominated in USD.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company does not hedge its exposure to currency risk.

The following table shows the foreign currency exposure structure of financial assets and liabilities as at 31 December 2021 and 2020:

	USD	RUB
	2021	2021
	KZT'000	KZT'000
<b>Assets</b>		
Cash and cash equivalents	64,654	-
Amounts due from banks and other financial institutions	679,103	-
Other assets	1,091	-
<b>Total financial assets</b>	<b>744,851</b>	<b>-</b>
<b>Liabilities</b>		
Other borrowed funds	-	(20,279,400)
Other liabilities	(64,751)	-
<b>Total financial liabilities</b>	<b>(64,751)</b>	<b>(20,279,400)</b>
<b>Net on and off balance sheet position</b>	<b>680,100</b>	<b>(20,279,400)</b>
		USD
		2020
		KZT'000
<b>Assets</b>		
Cash and cash equivalents		805,003
Loans to customers		849
Other assets		7,627
<b>Total financial assets</b>		<b>813,479</b>
<b>Liabilities</b>		
Other liabilities		(15,574)
<b>Total financial liabilities</b>		<b>(15,574)</b>
<b>Net on and off balance sheet position</b>		<b>797,905</b>

A change in the value of the KZT, as indicated below, against the following currencies at 31 December 2021 and 31 December 2020 would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis is on net of tax basis and is based on foreign currency exchange rate variances that the Company considered to be reasonably possible at the end of the reporting period. The analysis assumes that all other variables, in particular interest rates, remain constant.

KZT'000	2021		2020	
	Profit or loss	Equity	Profit or loss	Equity
20% appreciation of USD against KZT	136,020	136,020	159,581	159,581
5% depreciation of USD against KZT	(34,005)	(34,005)	(31,916)	(31,916)
20% appreciation of RUR against KZT	(4,055,880)	(4,055,880)	-	-
50% depreciation of RUB against KZT	10,139,700	10,139,700	-	-

**(d) Credit risk**

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company has policies and procedures for the management of credit exposures (both for recognised financial assets and unrecognised contractual commitments), including guidelines to limit portfolio concentration and the establishment of a Credit Committee, which actively monitors credit risk. The credit policy is reviewed and approved by the Management Board and the Board of Directors.

The credit policy establishes:

- procedures for reviewing and approving loan applications;
- methodology for the credit assessment of borrowers;
- methodology for the credit assessment of counterparties, issuers and insurance companies;
- methodology for the evaluation of collateral;
- credit documentation requirements;
- procedures for the ongoing monitoring of loans and other credit exposures.

The main task of credit risk management is the application of a weighted credit policy, considering profitability with safety of asset allocation at purchase of mortgage loans and control over position of loan portfolio based on in-depth, objective, complete and qualified monitoring.

Susceptibility to credit risk is controlled by assessment of the borrower's creditworthiness, obtaining high quality collateral, the receipt of a guarantee and obtaining recourse to the seller of the loans.

The Company's maximum exposure to credit risk is generally reflected in the carrying amounts of financial assets in the statement of financial position and unrecognised contractual commitment amounts. The impact of possible netting of assets and liabilities to reduce potential credit exposure is not significant.

The maximum exposure to credit risk from financial assets at the reporting date is as follows:

	2021 KZT'000	2020 KZT'000
<b>ASSETS</b>		
Cash and cash equivalents	100,684,841	63,619,060
Amounts due from banks and other financial institutions	80,722,166	69,728,933
Investment securities:		
- at fair value through profit or loss	2,079,816	2,932,039
- measured at amortised cost	928,960,811	917,887,952
Loans to customers and long-term receivables from sales of real estate under instalment agreements:		
- at fair value through profit or loss	3,599,878	-
- measured at amortised cost	135,649,359	135,292,670
Finance lease receivables	153,630,813	164,270,564
Other financial assets	35,926	24,588
<b>Total maximum exposure</b>	<b>1,405,363,610</b>	<b>1,353,755,806</b>

For the analysis of collateral held against loans to customers and concentration of credit risk in respect of loans to customers refer to Note 15.

As at 31 December 2021 and 31 December 2020 the Company has no debtors or groups of connected debtors, credit risk exposure to whom exceeds 10% of maximum credit risk exposure.

***Offsetting financial assets and financial liabilities***

The disclosures set out in the tables below include financial assets and financial liabilities that:

- are offset in the Company's statement of financial position; or
- are subject to an enforceable master netting arrangement or similar agreement that covers similar financial instruments, irrespective of whether, they are offset in the statement of financial position.

The agreements include global master repurchase agreements. Such financial instruments include sale and repurchase agreements and reverse sale and repurchase agreements. The Company receives and accepts collateral in the form of cash and marketable securities in respect of these sale and repurchase and reverse sale and repurchase agreements.

The Company's derivative transactions that are not transacted on the exchange are entered into under International Derivative Swaps and Dealers Association (ISDA) Master Netting Agreements. In general, under such agreements the amounts owed by each counterparty that are due on a single day in respect of transactions outstanding in the same currency under the agreement are aggregated into a single net amount payable by one party to the other. In certain circumstances, for example when a credit event such as a default occurs, all outstanding transactions under the agreement are terminated, the termination value is assessed, and only a single net amount is due or payable in settlement transactions.

The Company's sale and repurchase, reverse sale and repurchase transactions, and securities borrowings and lendings are covered by master agreements with netting terms similar to those of ISDA Master Netting Agreements.

The above ISDA and similar master netting arrangements do not meet the criteria for offsetting in the statement of financial position. This is because they create a right of set-off of recognised amounts that is enforceable only following an event of default, insolvency or bankruptcy of the Company or the counterparties. In addition, the Company and its counterparties do not intend to settle on a net basis or to realise the assets and settle the liabilities simultaneously.

Information on the financial instruments such as loans and deposits is not disclosed in the tables below, except for the cases when they are offset in the statement of financial position. The table below shows financial assets and financial liabilities subject to offsetting, enforceable master netting arrangements and similar arrangements:

	Gross amounts of		Related amounts not offset in the		Net amount
	Gross amounts of recognised financial assets/liabilities	Net amount of financial assets/liabilities presented in the statement of financial position	statement of financial position	statement of financial position	
<b>KZT'000</b>					
<b>31 December 2021</b>					
Reverse repurchase agreements	67,082,033	-	(66,394,914)	-	687,119
<b>Total financial liabilities</b>	<b>67,082,033</b>	<b>-</b>	<b>(66,394,914)</b>	<b>-</b>	<b>687,119</b>
<b>31 December 2020</b>					
Reverse repurchase agreements	28,855,796	-	(28,855,796)	-	-
<b>Total financial liabilities</b>	<b>28,855,796</b>	<b>-</b>	<b>(28,855,796)</b>	<b>-</b>	<b>-</b>

The gross amounts of financial assets and financial liabilities and their net amounts as presented in the statement of financial position that are disclosed in the above tables are measured in the statement of financial position on the following basis:

assets and liabilities resulting from sale and repurchase agreements, reverse sale and repurchase agreements and securities lending and borrowing – amortised cost.

**(e) Liquidity risk**

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk exists when the maturities of assets and liabilities do not match. The matching and or controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to liquidity management. It is unusual for financial institutions ever to be completely matched since business transacted is often of an uncertain term and of different types. An unmatched position potentially enhances profitability, but can also increase the risk of losses.

The Company maintains liquidity management with the objective of ensuring that funds will be available at all times to honour all cash flow obligations as they become due. The Company's liquidity policy is reviewed by the Management Board and approved by the Board of Directors.

The Company seeks to actively support a diversified and stable funding base comprising debt securities in issue, long-term and short-term loans from other banks, accompanied by diversified portfolios of highly liquid assets, in order to be able to respond quickly and smoothly to unforeseen liquidity requirements.

The Company's liquidity management policy requires:

- projecting cash flows by major currencies and taking into account the level of liquid assets necessary in relation thereto;
- maintaining a diverse range of funding sources;
- managing the concentration and profile of debts;
- maintaining debt financing plans;
- maintaining a portfolio of highly marketable assets that can easily be liquidated as protection against any interruption to cash flow;
- maintaining liquidity and funding contingency plans;
- monitoring liquidity ratios against regulatory requirements.

The following tables show the undiscounted cash flows on the Company's financial liabilities on the basis of their earliest possible contractual maturity. The total gross inflow and outflow disclosed in the tables is the contractual, undiscounted cash flows on the financial asset, liability or commitment. The Company's expected cash flows on these financial liabilities may vary significantly from this analysis.

The liquidity position of the Company as at 31 December 2021 was as follows:

KZT'000	Demand and less than 1 month	From 1 to 3 months	From 3 to 6 months	From 6 to 12 months	1-5 years	More than 5 years	Total gross amount outflow	Carrying amount
<b>Non-derivative financial liabilities</b>

As at 31 December 2021 included in the category “More than 5 years” are overdue loans to customers and finance lease receivables with net book values of KZT 1,653,724 thousand and KZT 354,335 thousand, respectively (31 December 2020: KZT 1,330,415 thousand and KZT 301,641 thousand, respectively).

## **25 Insurance risk management**

The Company enters into contracts for the provision of guarantees for the completion of construction. The Company guarantees the completion of the construction of a residential house in the event of an insurance case and the transfer of shares in a residential building to equity holders. As at 31 December 2021 the Company had 66 insurance agreements that were in force (31 December 2020: 27 agreements that were in force).

As at 31 December 2021 the maximum amount of liabilities under the valid guarantees issued by the Company was: KZT 380,005,445 thousand (31 December 2020: KZT 190,074,576 thousand).

The main risk that the Company faces under construction guarantee contracts is that the actual payments for warranty cases or the time of their payment may differ from those expected. Thus, the Company's goal is to accumulate sufficient reserves to pay for these liabilities.

Insurance risk is mainly managed through the assessment of financial and legal risks associated with the developer. The Company assesses the financial condition of the developer, performs analysis of the sources of financing the project, and conducts analysis of the adequacy of the price policy of the construction company. In addition, the Company also conducts legal assessment to establish legal and reputational risks for the project. To secure the customer's liability to complete construction of a residential house the Company accepts 100% interest in the authorised company and land plot with construction in progress as a security.

## **26 Capital management**

The Company defines as capital the following items defined by statutory regulation as capital for mortgage companies:

Tier 1 capital, which is comprised of ordinary share capital, share premium, prior periods' statutory retained earnings, accumulated losses and reserves created thereof and preference shares (within 15% of ordinary share capital) less intangible assets and current year statutory losses;

Tier 2 capital is required for the purposes of calculation of total capital and is comprised of current year's statutory income, revaluation reserves, preference shares (in excess of 15% of ordinary share capital), qualifying subordinated liabilities and total impairment allowance in the amount not exceeding 1.25% of credit risk-weighted assets.

Total capital, which is the sum of tier 1 capital and tier 2 capital (in the amount not exceeding tier 1 capital) less investments into equity or subordinated debt.

Various further limits and qualifying criteria are applied to the above elements of the capital base.

Under the current capital requirements set by the NBRK mortgage organisations have to maintain:

- a ratio of tier 1 capital to total statutory assets (k1);
- a ratio of credit risk-weighted contingent liabilities decreased by the amount of total reserves (provisions) not included in calculation of the equity (k1-2);
- a ratio of total capital to the sum of credit risk-weighted assets and contingent liabilities, decreased by the amount of total reserves (provisions) not included in calculation of the equity and quantified operational risk (k1-3).

	<b>2021</b>	<b>2020</b>
	<b>KZT'000</b>	<b>KZT'000</b>
<b>Tier 1 capital</b>		
Share capital	190,847,155	190,847,155
General reserves	2,734,447	2,734,447
Additional paid-in capital	3,389,392	3,389,392
Intangible assets	(28,465)	(134,229)

<b>Total tier 1 capital</b>	<b>203,449,537</b>	<b>188,964,986</b>
<b>Tier 2 capital</b>		
Total reserves (provisions) included in calculation of equity in the amount not exceeding 1.25% of credit-risk weighted assets	7,010,785	7,846,184
Net profit for the year in accordance with the NBRK requirements	99,504	-
<b>Total tier 2 capital</b>	<b>7,110,289</b>	<b>7,846,184</b>
<b>Total capital</b>	<b>210,559,826</b>	<b>196,811,170</b>
<b>Total statutory assets</b>	<b>1,424,636,554</b>	<b>1,374,938,209</b>
Credit risk weighted assets	560,862,812	627,694,733
Credit risk-weighted contingent liabilities	363,910,022	198,975,311
Operational risk	13,460,303	7,537,759
<b>Total credit risk weighted assets and contingent liabilities plus operational risk</b>	<b>938,233,137</b>	<b>834,207,803</b>
<b>Total reserves (provisions) not included in calculation of equity</b>	<b>9,216,541</b>	<b>3,306,035</b>
k1	<b>14%</b>	<b>14%</b>
k1-2	<b>22%</b>	<b>23%</b>
k1-3	<b>23%</b>	<b>24%</b>

As at 31 December 2021 and 231 December 2020 the minimum level of ratios as applicable to the Company are as follows:

- k1 – 6%;
- k1-2 – 6%;
- k1-3 – 12%.

In accordance with the NBRK requirements a net profit (loss) comprises the Company's net profit less reserve for the settlement of the guarantee event, in accordance with Article 29 of the Law of the Republic of Kazakhstan dated 7 April 2016 "On Shared Participation in Housing Construction" (Note 23(e)) as the reserve for the settlement of the guarantee event is restricted for distribution.

## **27 Takeover of BD JSC and HCGF JSC**

On 16 July 2020, based on the resolution of the absentee meeting of the Management Committee of NMH Baiterek JSC, a decision was made to approve the Transfer Act concerning transfer to the Company and the takeover agreement, as the successor of DB JSC, of all property, rights and obligations of DB JSC, as well as all rights and obligations in respect of all its creditors and debtors, and the Company's succession to all rights and obligations of DB JSC. In addition a decision was made to place the Company's shares within the limits of the authorised number of shares of 9,220,163 items at a price of KZT 11,239.54 per share, in favour of the Sole Shareholder of BD JSC in payment for the 100% of BD JSC shares acquired by the Company. The Company's share capital increased by KZT 103,630,354 after takeover of BD JSC. On 30 July 2020, after closing a transaction on placement of the Company's shares, BD JSC transferred all assets and liabilities, and the net assets were worth of KZT 100,682,460 thousand as at the date of transfer. Therefore, the Company recognised KZT 2,947,894 thousand in the additional paid-up capital.

On 4 November 2020, based on the resolution of the absentee meeting of the Management Committee of NMH Baiterek JSC, a decision was made to approve the Transfer Act concerning transfer to the Company and the takeover agreement, as the successor of HCGF JSC, of all property, rights and obligations of HCGF JSC, as well as all rights and obligations in respect of all its creditors and debtors, and the Company's succession to all rights and obligations of HCGF JSC. In addition a decision was made to place the Company's shares within the limits of the authorised number of shares of 2,329,479 items at a price of KZT 11,370.72 per share, in favour of the Sole Shareholder of HCGF JSC in payment for the 100% of HCGF JSC shares acquired by the Company. The Company's share capital increased by KZT 26,487,861 thousand after takeover of HCGF JSC. On 16 November 2020, after closing a transaction on placement of the Company's shares, HCGF JSC transferred all assets and liabilities, and the net assets were worth of KZT 26,853,426 thousand as at the date of transfer. Therefore, the Company recognised KZT 365,565 thousand in the additional paid-up capital.

	<b>As of the date of</b>		
	<b>As of the date of approval by the</b>	<b>shareholder</b>	<b>KZT'000</b>
	<b>actual transfer</b>	<b>shareholder</b>	<b>KZT'000</b>
BD JSC net assets	100,831,325	103,630,354	(2,799,029)
HCGF JSC net assets	26,853,426	26,487,861	365,565
<b>Total</b>	<b>127,684,751</b>	<b>130,118,215</b>	<b>(2,433,464)</b>

During the year ended 31 December 2020, the Company carried out a transaction to acquire shares of BD JSC and HCGF JSC by placing its shares in proportion to the share sales price ratio.

The table below shows the carrying amounts of BD JSC acquired by the Company on 30 July 2020 and HCGF JSC acquired by the Company on 16 November 2020 as at the date of acquisition of shares of BD JSC and HCGF JSC, by issuing shares of the Company based on the carrying amounts stated in the financial statements of the Company.

For the period from the beginning of the reporting year and to the date of acquisition, the net profit of DB JSC was KZT 7,436,649 thousand and that of HCGF JSC was KZT 1,922,234 thousand, respectively.

The following table summarises the recognised amounts of assets acquired and liabilities assumed at the takeover date:

KZT'000	BD JSC	BD JSC restated data	BD JSC given the restated data	HCGF JSC 16 November 2020
Acquisition date			30 July 2020

## 28 Contingencies

### (a) Insurance

The insurance industry in the Republic of Kazakhstan is in a developing state and many forms of insurance protection common in other parts of the world are not yet generally available. Company purchases a property insurance service, which should include insurance of property that serves as a collateral of the immovable property pledged at the Company against the mortgage loans, and insurance of leased housing, namely its structural elements, against the risks of loss, destruction and/or damage caused by natural calamities and emergency situations of the natural, climatic, household and/or man-made character, criminal and negligent actions of the third parties. Until the Company obtains adequate insurance coverage, there is a risk that the loss or destruction of certain assets could have a material adverse effect on the Company's operations and financial position.

### (b) Litigation

In the ordinary course of business, the Company is subject to legal actions and complaints. Management believes that the ultimate liability, if any, arising from such actions or complaints, will not have a material adverse effect on the financial conditions or the results of future operations of the Company.

**(c) Taxation contingencies in Kazakhstan**

The taxation system in Kazakhstan is relatively new and is characterised by frequent changes in legislation, official pronouncements and court decisions, which are often unclear, contradictory and subject to varying interpretation by different tax authorities, in particular recognition of income, expenses and other items of the financial statements under IFRS. Taxes are subject to review and investigation by various levels of authorities, which have the authority to impose severe fines and interest charges. A tax year generally remains open for review by the tax authorities for five subsequent calendar years; however, under certain circumstances a tax year may remain open longer.

These circumstances may create tax risks in Kazakhstan that are more significant than in other countries. Management believes that it has provided adequately for tax liabilities based on its interpretations of applicable tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on these financial statements, if the authorities were successful in enforcing their interpretations, could be significant.

**29 Related party transactions**

**(a) Transactions with the members of the Management Board and Board of Directors**

Total remuneration included in employee compensation is as follows (refer to Note 7):

	<b>2021</b>	<b>2020</b>
	<b>KZT'000</b>	<b>KZT'000</b>
Members of the Board of Directors	20,660	17,144
Members of the Management Board	283,692	183,686
	<b>304,352</b>	<b>200,830</b>

The above amounts include cash and non-cash benefits in respect of the members of the Management Board and Board of Directors.

The outstanding balances and average interest rates as at 31 December 2021 and 31 December 2020 for transactions with the members of the Management Board and the Board of Directors are as follows:

	<b>2021</b>	<b>Average interest</b>	<b>2020</b>	<b>Average interest</b>
	<b>KZT'000</b>	<b>rate, %</b>	<b>KZT'000</b>	<b>rate, %</b>
<b>Statement of financial position</b>				
Loans to customers	36,242	3.00	51,869	3.00
Other liabilities	77,760	-	78,719	-

**(b) Amounts on transactions with the members of the Management Board and Board of Directors included in the consolidated statement of profit or loss are as follows:**

	<b>2021</b>	<b>2020</b>
	<b>KZT'000</b>	<b>KZT'000</b>
<b>Statement of Profit or Loss</b>		
Interest income	1,754	752

**(c) Other related party transactions**

Other related parties include NMH Baiterek JSC and its subsidiaries (together the “Baiterek Group”) and other state organisations.

The amounts below are included in the statement of financial position and statement of profit or loss and other comprehensive income for transactions with other related parties as at 31 December 2021 and 31 December 2020:

	<b>2021</b>	<b>2021</b>	<b>2020</b>	<b>2020</b>
	<b>KZT'000</b>	<b>KZT'000</b>	<b>KZT'000</b>	<b>KZT'000</b>
	<b>Baiterek</b>	<b>Government</b>	<b>Baiterek</b>	<b>Government</b>
	<b>Group</b>	<b>institutions</b>	<b>Group</b>	<b>institutions</b>
<b>Statement of profit or loss</b>				
Interest income	10,259,336	103,587,909	6,778,773	35,966,914
Interest expense	(91,732,158)	(1,740,757)	(36,211,421)	(1,873,326)
Other operating income, net	37,659,237	(36,552,959)	177,449,253	(173,305,360)
Fee and commission expense	-	(2,417)	-	(1,783)
Impairment gains/(losses) on debt financial instruments	30,942	2,514,253	(27,188)	(2,616,305)
General and administrative expenses	-	(502,241)	(5,097)	(608,345)
Income tax expense	-	(3,895,916)	-	(2,194,096)

The balances with other related parties as at 31 December 2021 include:

	<b>Baiterek Group</b>		<b>Government institutions</b>	
	<b>KZT'000</b>	<b>Average interest rate, %</b>	<b>KZT'000</b>	<b>Average interest rate, %</b>
Cash and cash equivalents	13,713,298	7.75	85,817,017	7.82

Deferred tax liability	-	-	11,098,775	-
Other liabilities	-	-	237,294	-

### 30 Financial assets and liabilities: fair values and accounting classifications

#### (a) Accounting classifications and fair values

The table below sets out the carrying amounts and fair values of financial assets and financial liabilities as at 31 December 2021.

KZT'000	Amortised cost	FVTPL	Total carrying amount	Fair value
Cash and cash equivalents	100,684,841	-	100,684,841	100,684,841
Amounts due from banks and other financial institutions	80,722,166	-	80,722,166	78,339,456
Investment securities:				
- measured at amortised cost	928,960,811	-	928,960,811	954,242,866
- at fair value through profit or loss	-	2,079,816	2,079,816	2,079,816
Loans to customers and receivables from sales of real estate under instalment agreements				
- measured at amortised cost	135,649,359	-	135,649,359	102,733,371
- at fair value through profit or loss	-	3,599,878	3,599,878	3,599,878
Finance lease receivables	153,630,813	-	153,630,813	94,263,284
Other financial assets	35,926	-	35,926	35,637
	<b>1,399,683,916</b>	<b>5,679,694</b>	<b>1,405,363,610</b>	<b>1,335,979,149</b>
Debt securities issued	755,618,219	-	755,618,219	719,456,192
Other borrowed funds	218,164,832	-	218,164,832	167,532,317
Other financial liabilities	6,681,054	-	6,681,054	6,681,054
	<b>980,464,105</b>	<b>-</b>	<b>980,464,105</b>	<b>893,669,563</b>

The table below sets out the carrying amounts and fair values of financial assets and financial liabilities as at 31 December 2020.

KZT'000	Amortised cost	FVTPL	Total carrying amount	Fair value
Cash and cash equivalents	63,619,060	-	63,619,060	63,619,060
Amounts due from banks and other financial institutions	69,728,933	-	69,728,933	67,007,766
Investment securities:				
- measured at amortised cost	917,887,952	-	917,887,952	952,491,174
- at fair value through profit or loss	-	2,932,039	2,932,039	2,932,039
Loans to customers and receivables from sales of real estate under instalment agreements	135,292,670	-	135,292,670	114,287,749
Finance lease receivables	164,270,564	-	164,270,564	102,511,173
Other financial assets	24,588	-	24,588	24,588
	<b>1,350,823,767</b>	<b>2,932,039</b>	<b>1,353,755,806</b>	<b>1,302,873,549</b>
Debt securities issued	738,066,735	-	738,066,735	682,569,319
Other borrowed funds	208,647,686	-	208,647,686	143,258,180
Other financial liabilities	4,031,520	-	4,031,520	4,031,520
	<b>950,745,941</b>	<b>-</b>	<b>950,745,941</b>	<b>829,859,019</b>

The estimates of fair value are intended to approximate the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However given the uncertainties and the use of subjective judgment, the fair value should not be interpreted as being realisable in an immediate sale of the assets or settlement of liabilities.

Fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, the Company determines fair values using other valuation techniques.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

Valuation techniques include net present value and discounted cash flow models and comparison to similar instruments for which market observable prices exist, and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations. The objective of valuation techniques is to arrive at a fair value determination that reflects the price of the financial instrument at the reporting date that would have been determined by market participants acting at arm's length.

The Company uses widely recognised valuation models for determining the fair value of common and more simple financial instruments, like interest rate and currency swaps that use only observable market data and require little management judgment and estimation. Observable prices and model inputs are usually available in the market for listed debt and equity securities.

For more complex instruments, the Company uses proprietary valuation models. Some or all of the significant inputs into these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Example of instruments involving significant unobservable inputs includes certain loans and securities for which there is no active market.

The estimates of fair value are intended to approximate the amount for which a financial instrument can be exchanged between knowledgeable, willing parties in an arm's length transaction. However given the uncertainties and the use of subjective judgment, the fair value should not be interpreted as being realisable in an immediate sale of the assets or settlement of liabilities.

The following assumptions are used by management to estimate the fair values of financial instruments:

- discount rate of 13.1% is used for discounting future cash flows from loans to banks (2020: 12.7%);
- discount rates of 11.3% - 20.7% are used for discounting future cash flows from loans to customers and receivables from sales of real estate under instalment agreements (2020: 6.5% - 14.9%);
- discount rates of 10.3% are used for discounting future cash flows from finance lease receivables (2020: 9.9%);
- discount rates of 7.5%-10.3% are used for discounting future cash inflows/outflows from securities issued and other borrowed funds denominated in RUB and KZT, respectively (2020: 12.4%-12.7%);

**(b) Fair value hierarchy**

The Company measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements:

- Level 1: quoted market price (unadjusted) in an active market for an identical instrument.
- Level 2: inputs other than quotes prices included within Level 1 that are observable either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3: inputs that are unobservable. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect difference between the instruments.

The table below analyses financial instruments measured at fair value at 31 December 2021, by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognised in the statement of financial position:

<b>Financial assets</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
Investment securities measured at fair value through profit or loss	2,079,816	-	2,079,816
Loans to customers at fair value through profit or loss	-	3,599,878	3,599,878
	<b>2,079,816</b>	<b>3,599,878</b>	<b>5,679,694</b>

The table below analyses financial instruments measured at fair value at 31 December 2020, by the level in the fair value hierarchy into which the fair value measurement is categorised: The amounts are based on the values recognised in the statement of financial position:

<b>Financial assets</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
Investment securities measured at fair value through profit or loss	2,066,079	865,960	2,932,039
	<b>2,066,079</b>	<b>865,960</b>	<b>2,932,039</b>

Changes in fair value measurements categorised to Level 3 in the fair value hierarchy for 2021, were as follows:

	<b>2021</b>	<b>2020</b>
<b>Financial assets</b>		
<b>Balance at the beginning of the year</b>	865,960	933,590
Net realised loss on investment securities at fair value through profit or loss	327,671	(19,505)
Interest accrued	87,593	-
Interest paid	(87,593)	(87,135)
Purchases into Level 3	3,599,878	39,010
Repaid	(1,193,631)	-
<b>Balance at the end of the year</b>	<b>3,599,878</b>	<b>865,960</b>

Total gains or losses included in profit or loss for 2021 in the above table are presented in the statement of profit or loss and other comprehensive income as follows:

	<b>2021</b>	<b>2020</b>
<b>Financial assets</b>		
Net gain/(loss) on financial instruments at fair value through profit or loss	-	(19,505)

The table below sets out information about significant unobservable inputs used at year end in the measuring financial instruments categorised as Level 3 in the fair value hierarchy as at 31 December 2021:

<b>Type of instrument</b>	<b>Fair value</b>	<b>Valuation technique</b>	<b>Significant unobservable inputs</b>	<b>Fair value measurement sensitivity to unobservable inputs</b>
Loans to customers at fair value through profit or loss	3,599,878	Discounted cash flows	Discount rate of 23.74%	Significant increase in any of the input data separately will result in decrease of fair value. Significant decrease would result in higher fair value.

The table below sets out information about significant unobservable inputs used at year end in the measuring financial instruments categorised as Level 3 in the fair value hierarchy as at 31 December 2020:

Type of instrument	Fair value	Valuation technique	Significant unobservable inputs	Fair value measurement sensitivity to unobservable inputs
Securities measured at fair value through profit or loss	865,960	Discounted cash flows	Discount rate of 17.85%	Significant increase in any of the input data separately will result in decrease of fair value. Significant decrease would result in higher fair value.

The following table analyses the fair value of financial instruments not measured at fair value, by the level in the fair value hierarchy into which each fair value measurement is categorised as at 31 December 2021:

KZT'000	Level 2	Level 3	Total fair values	Total carrying amount
<b>Assets</b>				
Cash and cash equivalents	100,684,841	-	100,684,841	100,684,841
Placements with banks and other financial institutions	78,339,456	-	78,339,456	80,722,166
Investment securities measured at amortised cost	954,242,866	-	954,242,866	928,960,811
Loans to customers and receivables from sales of real estate under instalment agreements measured at amortised cost	101,039,782	1,693,588	102,733,371	135,649,359
Finance lease receivables	88,509,753	5,753,531	94,263,284	153,630,813
Other financial assets	35,637	-	35,637	35,926
<b>Liabilities</b>				
Debt securities issued	719,456,192	-	719,456,192	755,618,219
Other borrowed funds	167,532,317	-	167,532,317	218,164,832
Other financial liabilities	6,681,054	-	6,681,054	6,681,054

The following table analyses the fair value of financial instruments not measured at fair value, by the level in the fair value hierarchy into which each fair value measurement is categorised as at 31 December 2020:

KZT'000	Level 2	Level 3	Total fair values	Total carrying amount
<b>Assets</b>				
Cash and cash equivalents	63,619,060	-	63,619,060	63,619,060
Placements with banks and other financial institutions	67,007,766	-	67,007,766	69,728,933
Investment securities measured at amortised cost	952,491,174	-	952,491,174	917,887,952
Loans to customers and receivables from sales of real estate under instalment agreements measured at amortised cost	111,338,645	2,949,104	114,287,749	135,292,670
Finance lease receivables	93,556,875	8,954,298	102,511,173	164,270,564
Other financial assets	24,588	-	24,588	24,588
<b>Liabilities</b>				
Debt securities issued	682,569,319	-	682,569,319	738,066,735
Other borrowed funds	143,258,180	-	143,258,180	208,647,686
Other financial liabilities	4,031,520	-	4,031,520	4,031,520

## **31 Segment reporting**

The Company's operations are highly integrated and constitute a single business segment for the purposes of IFRS 8 *Operating Segments*. The Company's assets are concentrated in the Republic of Kazakhstan, and the Company's revenues are derived from operations in, and connected with, the Republic of Kazakhstan. The Chief Operating Decision Maker, in the case of the Company, the Chairman of the Management Board, only receives and reviews the information on the Company as a whole.
